

INSTALLATION INSTRUCTIONS

GUIDING LITE™ GUIDING LITE2™ REFLECTO-LITE™ DOCK REFLECTORS

Thank You and congratulations on your purchase of Guiding Lite™, Guiding Lite2™ or Reflecto-Lite™ Dock Reflectors. PLEASE READ SAFETY WARNINGS BELOW BEFORE INSTALLATION OR USAGE OF THESE UNITS! Installation is simple. Utilize a wall anchoring tool such as manufactured by Hilti or other company to simply “shoot” anchors, using reflectors holes, into the proper position on the wall as detailed below. NOTE: Please follow manufacturers directions for safe and proper use of any anchoring equipment. Otherwise use the following: 1" plastic screw anchors with screws, drill with 1/4" drill bit, scribe, ruler, level, and screw driver. The reflectors should be vertically mounted approximately 2" below the rubber bumpers, but should be adjusted to avoid contact with the drive. Drill one of the top holes first and mount in place. Leave this screw loose so as to allow vertical and plumb adjustments prior to tightening. Drill the remaining holes then tighten all screws. Units require no electricity to operate.
