GUARDING

EdgeGard™ Dock Gates

**Straight and Folding-Rail
Designs Safely Protect
Personnel and Equipment**

EdgeGard™ Dock Gates from Wildeck are durable, reliable and safe. They are easy to install and operate, and provide an effective barrier for personnel and equipment working near open dock doors, truck loading pits or other hazardous areas.

- ▶ **Easy to Install**
- ▶ **Easy to Operate**
- ▶ **Easy to Access**
- ▶ **Easy to Protect**
- ▶ **Easy to Own**

Unique Folding-Rail design protects wider areas and minimizes the required gate clearance height.

“The Wildeck® EdgeGard™ gate is far superior for protecting personnel near our loading dock than the old chain gate we were using. When the EdgeGard is lowered into position, it's less likely that an individual will stumble off the dock during active packaging or truck loading activity.” – Satisfied Plant Manager

EdgeGard™ Dock Gates have Wildeck® quality built in. They are available as a Straight-Rail Gate, or unique Folding-Rail design that protects wider openings and minimizes the required clearance height. When properly anchored, EdgeGard™ gates meet the 200 lb. OSHA 1910.23 load force protection requirement.

The smooth cantilever action of Wildeck's innovative gate design ensures easy operation and long service life. When raised, the gate completely clears the opening offering unimpeded traffic flow and maximum accessibility. When closed, the gate is held securely in place and does not move.

Contact a Wildeck® sales representative today to learn more about EdgeGard™ Dock Gates, Wilgard® guard rail, or other Wildeck® safety guarding products – because quality and safety matter.

Straight-Rail Gate is ideal for standard dock widths.

EDGE GARD™ DOCK GATE

GENERAL SPECIFICATIONS

FEATURES AND BENEFITS:

- ▶ EdgeGuard™ Gate top rails are 42" high (above floor level) when closed.
- ▶ Available in four configurations to adapt to your application requirements.
