

# DOCK ALERT

- Loading Docks are inherently “Blind” Corners because forklifts “hide” inside trailers.
- Pedestrians and other forklifts are in **danger of being hit** when forklift exits trailer.
- Forklift and driver are in **danger of having truck move** while in the trailer.

**Caution: Forklift in Trailer!**

**Dock ALERT:**  
 Detects reflector on passing forklift.  
 Activates/Deactivates:  
 - Strobe  
 - Audible Device  
 - Truck Dispatch Light } One or More

**Dock ALERT Warns Pedestrians and Other Drivers That A Forklift Is Inside Trailer**
