

## Container Ramp

*The perfect answer for loading and unloading shipping containers.*

The Bluff Container Ramp is the perfect answer for your need to load and unload shipping containers. It allows you to safely navigate the transition from ground to the bed of the container.

Bluff Container Ramps are built tough to withstand heavy use. They are built to last.

These Ramps feature a full width stiffener to provide strength and to bump up against the container. Locking chains with a specially designed

keeper allow you to easily lock it into the holes in the container. After the keepers are in place, taking up the slack in the chain is simple and quick with the sturdy grab notch bracket welded to the sides of the Ramp. The result is a safe, sturdy ramp locked firmly to the container. You can now load and unload your container safely – AND QUICKLY!

Container Ramps are available in 15K, 20K, 25K, and 30K capacities. Other sizes available.

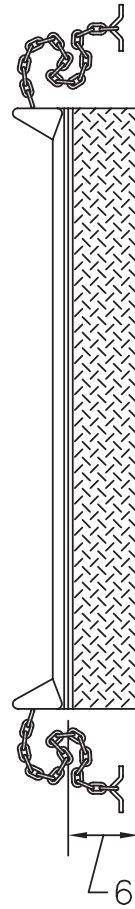

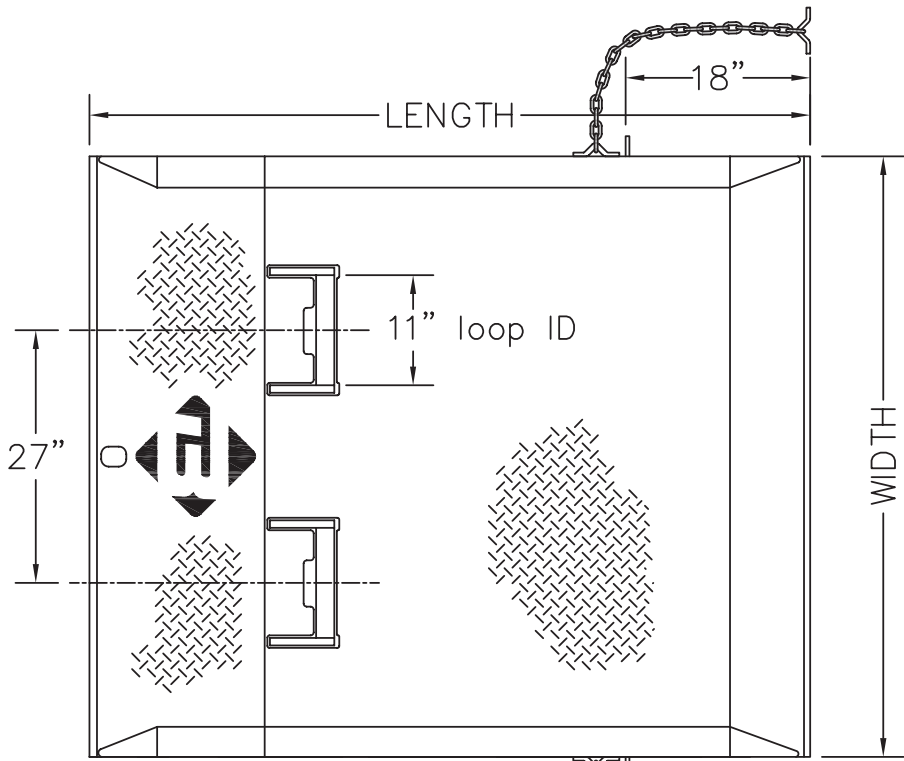

- **RUGGED**
- **EFFICIENT**
- **SAFE**
- **ECONOMICAL**

Manufactured and tested in compliance with ANSI Standard MH30.2
