

# ClearCap™ Forklift Covers

Every lift should  
be equipped!

Keeps the seat dry!

Easy installation & removal!

**A Clear Solution to a Common Problem™**

**ClearCap™** is a rugged & well designed roof cover for current & late model lift trucks. Made of a high impact, non yellowing polycarbonate, **ClearCap™** has you covered rain or shine with clear & tinted versions.

## Engineered Forklift Roofs

**ClearCap™** features a unique dome design that diverts rain & small particulates away from the operator. Channels & gutters eliminate cascading water. This alternative to shrink-wrap, plywood & cardboard provides greater comfort & safety.

OSHA standard 1917.43 (e) (1) (ii) clearly states, "Overhead guards shall not obstruct the operator's view."

## Easy to Install, Reasonably Priced

**ClearCap™** is quick & easy to install. No drilling or tapping is required; eliminating expensive shop time. Phone or fax us your overhead guard dimensions & lift truck model. We'll help you find a **ClearCap™** model that fits your forklift.
