

Streamline Your Onion Handling Operations

Decade bulk containers provide more efficient handling, greater product protection

Now you can avoid unnecessary produce transfers from harvesting equipment to trucks, to boxes, to burlap bags, and a myriad of other time-consuming steps. When mounted directly on harvesting equipment, Decade containers can transport onions directly from the field to the drying chambers, and on into the packing shed or onto the truck to market. In addition, Decade's unique 3-runner design permits the container to be emptied directly from the fork lift, eliminating the need for bin dumpers.

From field to marketplace, Decade containers make produce handling simple, quick and cost-effective.

Engineered with Produce in Mind

Constructed of high-density polyethylene (HDPE) structural foam materials to stand the test of time, Decade reusable containers are strong, yet lightweight. They offer increased life span, superior corrosion resistance, and require virtually no maintenance. Unlike wood crates that may harbor splinters, pests, pathogens, mold or other undesirable elements, Decade containers meet USDA/HACCP standards for direct food contact.

- **High concentration of sidewall & base vents** provide faster cooling, drying, and processing times than competitive plastic containers.
- **Unique 3-runner design** provides critical clearance dimensions to protect produce from damage when containers are stacked.
- **Smooth surfaces** allow better pack-out; can be high-pressure washed and sterilized.
- **Rounded inner corners** minimize bruising to help maintain the quality of the onions.
- **Standard 48" x 40" footprint** allows maximum truck cube-out.
- **Consistent, more accurate tare weight** than wood containers that can absorb excess moisture and water.
- **Customizable** with attachable lids, casters, drain plugs, name plates, drop doors and label holders.

MACX® Fixed-Wall Containers

MACX fixed-wall containers are built to meet the most rigorous demands. The heavy-duty construction is tough, yet lightweight, so these containers can be moved by hand when empty and are stackable up to 10 high, even when fully loaded.

Specifications

External Dimensions	48" x 40" x 31"
Internal Dimensions	45" x 36.75" x 25.75"
Maximum Load Capacity	1,500 lbs.
Tare Weight	89 lbs.
Maximum Stacking Load	14,000 lbs.
Volume Capacity	190 U.S. Gallons, 20.4 bushels, 25.4 cubic feet
