# Recycling Industries

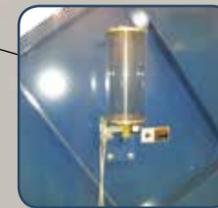

# 4000 Series Hinged Steel Belt Conveyor

# Metal Fab Industries

Endura-Veyor Inc. 4000 Series are tough and reliable belt conveyors. Our 4" pitch steel belt conveyors are frequently used in the Recycling Industry for feeding balers, sorting lines and shredders. In addition they are used in the Metal Fabrication Industry for stamped or forged parts as well as stamping and machining scrap. The modular conveyor design allows us to easily offer customized conveyor and belt options for specialized applications.
