

Fully powered pallet truck Panther Maxi - benefits and features

Great durability = low costs

- Quality everywhere (choice of material, tolerances, construction) – minimum wear
- Simple construction = easy to exchange wearing parts
- AC motor with fewer wearing parts = long operation life
- Low power consumption = long battery life time
- * Pump unit with special oil = great durability
- * Easy access to battery for maintenance
- * Service manual available on the internet

Lifting performance = user-friendly and efficient

- * Ergonomic handle
- * Multiflex function = easy operation
- * Close tolerances = low noise level
- * Continuous product development = lifting performance for the customer
- * Low own weight = low current consumption = long operation time
- * Short overall measurements = small space requirements
- * Load dependent pressure on propulsion wheel = optimum "road-holding qualities"
- Narrower than the width of a EUR pallet
- Handle fitted in the one side = optimum view and manoeuvrability
- Large turning angle
- Adjustable acceleration and speed
- Infinitely variable speed control
- Programmable controller = optimum user-friendly
- Electronic brake, maximising safe driving on slopes
- Brake energy is used for battery charging
- Hour meter, battery indicator and error codes in the same digital display

Optimum safety

- * Safety stop both horizontally and vertically on the tiller arm
- All control buttons on handle

Features marked with * are unique for the Logitrans products
