## Cirtronics Milford, NH Manufacturing (Electronic)

jacirtronics1.jpg

Cirtronics is a contract electronic manufacturer, assembling custom circuit boards. They have been gradually filling their 80,000 sq.ft. facility with Align™ Adjustable Height Workstations (and predecessor Ergomation models). They use the benches in every department, including assembly, inspection, machining and many others.

jacirtronics2.jpg

Inspection stations use Align benches without Nexus Systems.

jacirtronics3.jpg

Components are fed to the worksurface via Nexus variable angle shelves.
