Johnson Controls installed 28 work cubicles in their System Products Hard Lab. They used a variety of below-(ESD) worksurface pedestals, including drawer cabs, door cabs and 300 file drawers.

tsjcon5.jpg

20 ESD mobile cabinets house electronic parts that are shared among the workstations.

Colors were chosen to combine with some existing Steelcase furniture. Workbench areas are used as desks, traditional workbenches (with FlexWorks) and open work areas.
