Rydell recently built a brand-new dealership, and Lista workbays were a centerpiece of the service department redesign (the old dealership will be torn down). Each workbay includes a huge amount of storage space for the technicians, as well as countertop workspace with a stainless steel worksurface.

Special housings were designed to hold the lift controls, which can be operated with levers on the front of the door. There's a keyboard tray drawer at the top of the cabinet.

The cabinets are beige and Polaris Blue (to match the Rotary lifts).

Stacked DW cabinets feature a shelf with a retractable door above drawers.
