Another version of a custom
polishing bench.

Tiffany built a manufacturing facility in Rhode Island to make various original products that they sell. These customized benches are for polishing large silver items. The polished-off particles of silver are captured through the custom ventilation system.

jatiff4.jpg

Molds for silver items are stored on heavy-duty roll-out trays in an adjacent Storage Wall.

jatiff5.jpg

A Storage Wall combining drawers underneath and lockable hinged door shelf cabinets above, with a hinged door section to the right.

An early packing bench, designed before our official packing bench line was debuted.
