Nexus™ System Packing Bench Accessory Features

Our packing benches can be configured with cabinet bases or legs to create a cost-effective, custom solution. With our modular drawer storage cabinets doubling as pedestals, users have systematic, efficient storage for their supplies, tools, paperwork and accessories.

Beneath the worksurface, vertical wire shelf dividers provide custom storage for corrugated or other bulk materials.

Above the worksurface, Lista's modular Nexus System provides a full range of accessories that offer easy access to packing materials at arm height. There are holders for rolls of paper, bubble rolls and labels. Vertical wire shelf dividers are available to keep shelf storage organized. Other Nexus accessories include louvered panels to hold bins, plastic box rails, electrical attachments, overhead cabinets, computer monitor trays, document holders and many more (see pages 60-67).

Packing benches can be designed using a full range of Lista workbench products:

- workbench components, pages 32-37
- worksurfaces, page 31
- cabinet pedestals, pages 38-49
- Nexus System accessories, pages 60-67

The additional components shown on the following two pages enable you to specify a packing bench that exactly suits your needs.

Nexus™ System Flow Racks

Nexus flow racks are an effective material handling solution for presenting parts for picking, kitting or assembly.

Parts delivery by gravity feeding cartons or parts bins reduces the need for parts delivery personnel, allowing one person to service more production or packaging stations. By assembling flow racks in rows, you can achieve even greater productivity and convenience.

Designed to accept any Nexus System accessories, flow racks can be configured to exactly suit your needs. For the complete range of Nexus System accessories, see pages 61-67:

- shelves, page 61
- lights, page 62
- power, page 63
- articulating arm accessories, page 66

Add a worksurface, and your stationary Nexus flow rack becomes a highly efficient assembly or work station.

Flow rack frames are 86 1/4" high and 48" deep, and are available in five widths (30", 36", 42", 48" and 60").
