

E-Z Load™

Universal Storage Shed

Overview

Designed around the needs of textile and linen rental companies serving; restaurants, hospitals, hotels, automotive repair shops and machine shops, the E-Z Load Universal Storage Shed is typically used to store soiled linens, towels and shop rags outside the primary business location. This frees up space and helps facilitate easy pick-up and delivery by textile and linen rental route drivers.

The Penco E-Z Load Storage Shed's rugged construction ensures long life, protection from the elements and ventilation. It is designed to discourage rodents or other animals from entering. The door of the shed can be secured with an optional built in lock or padlock to prevent unauthorized use or theft.

Accessories include an optional hanging pole for additional storage of hanging items or garments and an optional shelf which allows organization within the shed.

33 Cubic Foot Unit Shown Above

Features

- Ergonomically designed 14" off the ground to prevent bending and stooping.
- Small units provides 10.5 square feet and the large unit 21 square feet internal floor space.
- Floor is fabricated from 16 gauge stainless steel
- Ventilation is provided by a series of 1/4" x 3" slots in the floor of the shed.
- Door latches in 3 points for maximum security.
- Integral padlock lug enables use of a padlock or it can be fit with a built-in combination lock. (Use Zephyr 1970 or Master 1670 – available from Penco.)
- Optional hanging pole and optional shelf are available to organize the shed's interior.

Some of the Many Storage Uses for the E-Z Load™ Shed

| Where Used | Purpose |
