LP Pick
Light-Directed Order Picking

LIGHTNING PICK

Optimize Productivity and Accuracy

Lightning Pick's LP Pick solution is the most flexible and powerful light-directed picking application available. Today, Lightning Pick is the number one installed pick-to-light system in North America, leading the industry both in new installations and in retrofits of legacy systems.

With pick-to-light, lights are mounted to gravity flow rack, shelving, workstations or other material handling media. The lights illuminate to show operators the correct pick face locations and quantities required to complete an order.

LP Pick is the fastest operator-based pick automation available to boost the speed and order quality of your broken case quantity and piece picking operations. LP Pick is ideal for popular picking techniques including Zone Picking, Cluster Picking and others. Lightning Pick's best-in-class solutions increase pick rate productivity, order accuracy and cost efficiency throughout this labor-intensive process.

Applications

- Broken Case/Piece Picking for Order Fulfillment
- Kitting
- Assembly
- Error-proofing for Manufacturing Applications
- Ideal for Order Fulfillment operations with a low to moderate number of SKUs, plus medium to high SKU density and velocity
- Optmizes Zone Picking, Cluster Picking and other popular order picking techniques

INTEGRATOR PARTNER

Cisco-Eagle

LP Pick   Light-Directed Order Picking

Hardware Advantage

All our pick-to-light hardware options offer superior light module design and operate independently, making system installation, reconfiguration, maintenance and expansion fast, easy and affordable.
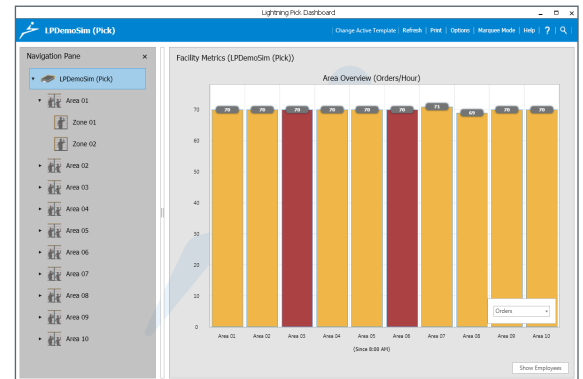

Lightning Pick's deep catalog of interoperable light module series offers advanced features and options to optimize your unique application requirements. Our hardware platform has been tested and proven across hundreds of installations worldwide.

Software Innovation

Our leading pick-to-light systems are driven by the powerful Lightning Pick order fulfillment execution software. Advanced data management capabilities provide easy manipulation of your business intelligence and reporting needs. As a Microsoft-Certified Partner, Lightning Pick provides a revolutionary software framework—simplifying your light-directed application's integration, installation, support and performance.

The LP Management Console provides total control to quickly add products and locations, change staffing and work zones, expedite hot orders, verify order volumes and monitor all system activities.

The LP Ops Manager features graphical dashboards for complete visibility into your light-directed picking processes and real-time productivity statistics.

Special Features

- Flexible, proven hardware platform with deep catalog of features and options
- The industry's most advanced, proactive order fulfillment execution software.
- Fastest growing pick-to-light user community in both new installations and legacy system retrofit projects.
- Access to real-time statistics on picker productivity, order volumes and all system activities.
- Quickest training curve and start-up time
