

### Lock with WS46 bar

#### Features:

- To lock drawers in a single-user cabinet.
- Locking bars are factory installed in the cabinets.
- Locks can be factory installed on request.
- When locks are already installed, customer can easily assemble the cabinet to the top of the bench by removing drawers only.
- To add locks to a cabinet, customer does not have to remove the drawers.

#### Inconvenience:

- The locking bar does not prevent access between two drawers for a multi-user cabinet.

### Lock with WS42 shelf

#### Features:

- To lock drawers.
- The shelf prevents access between two drawers or between a drawer and a door for a multi user cabinet.
- Shelves and locks can be factory installed on request.

#### Inconveniences:

- To add a lock with shelf on a drawer, the glides of the drawer just above must to be removed in order to insert the shelf.
