

Indoor Convex Detection Mirrors

Indoor Convex Detection Mirrors are designed to prevent intersection accidents in an industrial application.

Convex mirrors can be positioned to reflect a hidden area to a forklift operator. These mirrors can also be directed to allow equipment operators to view co-workers approaching from behind to reduce accidents.

Convex mirrors should be mounted at the end of alternating aisles to reflect the view of the traffic moving from the neighboring isles.

Small convexes can be used in offices to view hallways or reception areas for visitors or moving pedestrian traffic.

- **20% Brighter Than Glass Mirrors**
- **Mounting Hardware Included**
- **Less Distortion**
- **Economical**
- **Longer Lasting**
- **Lighter Weight**

■ **Easy to Install**

Mounted Easily with the Provided Hardware

■ **Security & Theft Prevention**

Retail Convex Mirror Usage Benefits: Prevention of Shoplifting & Security from Entry Doors with Poor Viewing Access

■ **Wide Angle Vision**

Permits You to See Around Corners, Over Center Aisles & Blind Corners

■ **Provides Recognition of O.S.H.A. Compliance**

Assures That Evaluation Has Been Placed on the Safety of Busy Intersections
