ASSEMBLY INSTRUCTIONS:

Steel King Industries recommends that this product be assembled only by qualified personnel, experienced in assembly of industrial guard rail products, and knowledgeable of all safety regulations and practices. These instructions are intended only for use by qualified individuals using all proper safety equipment.

The guard rail system is extremely heavy, and if not properly secured during installation and assembly could fall, possible causing injury or death as well as damage to property.

Contact Steel King Industries or your local Steel King Representative for the name and contact information of a qualified installer. Users of this information agree to indemnify and hold harmless Steel King Industries from any and all liability.

Step #1: Check the Material

A. Check to make certain that all materials have been received. Materials should be checked against the packing lists and Bill of Lading.

B. Notify the shipper immediately of any shortages or product damage.

Step #2: Check the Area:

A. Clear the area where the guard rail is to be located.

B. Check the area for all obstructions such as pipes, building columns, etc., to insure a clear area for the installation of the guard rail.
Step #3: Lay Out floor:

Recommended tools:

- Tape Measure
- Chalk Line

A. Establish the guard rail lay out.

B. Snap a chalk line establishing the front edge of the guard rail posts. The chalk line should run the entire length of the row of guard rail.
Step #4: Assemble Guard Rail System:

Recommended tools:

- Air compressor,
- Torque wrench,
- 3/4” drive impacts or equivalent

A. Distribute the guard rail posts and rails for assembly near their final installed position.

B. Bolt the rails to the guard rail posts using the 1/2” diameter x 1” long bolts. Torque the bolt to 60 ft-lbs.
