New!

Help Prevent Rack Damage
New aftermarket column protector is flexible and affordable.

Increase the abuse resistance on SK2000 upright columns with our new patented SK Snap-Guard column protector. Steel King’s SK Snap-Guard is an adjustable column protector for boltless rack that protects the upright rack column from forklift damage.

Snap-Guard is constructed of formed angle with an all-welded top cap for cleanliness and safety. Snap-Guard features an exclusive 4-rivet connection that automatically locks into the upright column. Snap-Guard is available in standard sizes of 12, 18 or 24 inches, custom lengths can be built upon request.

Adjustable, removable and flexible, the Snap-Guard can be used to protect each storage level. A great aftermarket addition to any pallet rack installation, Snap-Guard is available immediately through Steel King’s Quick Ship program.*
