PCT-3500 Shown with optional equipment

Industrial environments demand a special kind of equipment. Wesley International's Pack Mule electric vehicles are meticulously engineered for safety, reliability, and low cost of ownership. From the dual front wheels to the sealed motor, Wesley International's vehicles offer increased stability and reduced down time. As a result, Pack Mule electric vehicles have been the choice of discerning operators and buyers who know that increased productivity and reduced maintenance cost deliver greater profits.

Pack Mule's PCT-3500 series vehicles are designed to tow up to 5000 lbs. while carrying a single operator. The PCT-3500 is perfect for use in lean, just in time manufacturing operations, distribution centers, warehouses, and anywhere towing a load is required. Each vehicle can be purchased in a standard configuration or Wesley International will custom build a vehicle to your specifications. Custom equipment can be designed and produced quickly and is made with the same commitment to safety, reliability, and low cost of ownership.

Why buy a Pack Mule? Unique safety features, increased productivity, reduced maintenance and custom design...

Can you afford not to buy a Pack Mule?
