

# *New* THE **24 VOLT** **REVOLUTION**

## The E24™ Conveyor

### The newest 24-volt live roller technology

This new conveyor technology provides high performance and reliable solutions within a safe, quiet working environment. The self-contained modules arrive fully assembled and tested. These quick-connect modules provide a substantial reduction in wiring and installation. E24™ is ideal for distribution operations with frequent layout changes or for manufacturers that need to quickly change process lines. The modular design marries the lowest total cost of ownership with the highest levels of performance and safety. Our solutions can either be configured with internal plug and play controls, or integrated with external controls. E24™ is also available with Hytrol's award-winning EZ-Logic® technology, featuring dynamic zone accumulation.

## The Simplicity

### 10 times the life of traditional MDR motors—maintenance is a breeze

E24™ maintenance is minimal. The drive motors run only when needed. In normal operation, the long life motors are rated at 8-10 times the hours of traditional MDR motors. If motor replacement is necessary, parts are minimized, because the standard drive motor fits a wide range of roller diameters, roller lengths and speed requirements.

## The Difference

### New technology eliminates heat, motor-life issues

E24™ resolves issues such as heat dissipation, limited motor life span, lack of sufficient torque, and the inability to use 1-3/8" rollers, which has significantly limited using motor-driven rollers in what are otherwise excellent applications. **These limitations are now issues of the past.**

# Extended Operational Life

## A breakthrough—easy to implement, maintain, and operate

- **Safe, 24 VDC operation** reduces risks to maintenance and operators
- **Substantially Quieter Operation**
- **Energy efficient motors and logic**
- **Modular design** is easily configurable
- **Plug and play** for quick setup
- **Minimal maintenance**
- **Extended motor life** 8-10 times conventional rollers
- **Significant space savings**
- **Absolute product control** with self-contained module controllers
- **Minimum & zero pressure** accumulation flexibility and product protection
- **Easily integrated with PC's or PLC's**

## Where can you use E24?

### What can you accomplish with this innovative roller system?

With expanded capabilities, low profile design, and a wide range of configuration possibilities, many applications are now appropriate for E24™, including:

- Packaging lines
- Linking automation cells
- Machine feeding
- In-motion weighing
- Manifesting stations
- Assembly lines
- Food processing
- Postal and document handling
- Pharmaceutical order picking
- Turntables
- Lift tables
- Gates
- AGV's
