

**No one protects
your facility,
equipment, and
people like Sentry
Protection Products.**

corners
concrete
racks

The Sentry Protection family of products offer the most complete impact protection available to fully protect your investments — your facility, your people, and your equipment. From parking garages to warehouses to materials-handling facilities, our full-line of column, corner, rack, and concrete cushion products absorb impacts time and time again. Always on-guard, Sentry products install and protect at a fraction of the cost of most bollard, poured concrete and other protection systems.

All Sentry Protection Products are:

Extremely versatile

- Wide variety of sizes to fit most applications
- Ideal in a variety of environments — parking garages, warehouses, industrial, or anywhere columns, posts, beams or corners are exposed

Incredibly tough

- Protects in most any condition
- Molded from semi-flexible and stress-crack resistant plastics that minimize the force of tow motor, vehicle and other impacts that can damage columns, racks, corners, concrete, supports, vehicles and operators
- Chemical-resistant and non-conductive

Highly visible and easily maintained

- Bright Safety Yellow with contrasting black straps to maximize visibility
- UV stabilized plastics prevent fading or discoloration
- Waterproof, easy to clean and removable for maintenance

Easily installed

- No tools required, one person can install in seconds
- Most products attach using Velcro straps and closures
- Save time, labor, and the cost of construction, materials and downtime

Cost-effective

- Built to last and absorb impact after impact
- Economically protects the structural integrity of your building
- Costs a fraction of rack, floor, column or inventory repair/replacement
- A one-time “insurance” investment

Sentry offers **complete protection** in a variety of product families from columns to corners to racks.

Column Sentry®

For every column in your facility. We have the protection that fits and lasts. From our smallest 4" x 4" Column Sentry to our largest 20" x 20", we have your columns covered. Fits columns from 4-inch to 20-inch squares, rounds, and H's.

Rack Sentry®

Rack Sentry prevents rack damage and accommodates most rack sizes including 3", 3.25", and 4". Stackable for increased vertical protection, with sizes to accommodate corners and horizontal beams.

Park Sentry®

Uniquely designed polypropylene column protector that can be quickly and easily customized to fit around virtually any square column or post to protect vehicles and columns.

Concrete Wrap

Cushions existing concrete bases from posts and pillars to columns and flat walls. Two-inch thick closed-cell foam with protective outer shell, easily installs on flat walls, round posts, and curves.

Corner Sentry™

The best protection for wall corners, vehicles, and your facility. The only energy-absorbing corner protector that protects corners of all kinds, in any application. Attaches easily via wall anchors or adhesives.
