

The PalletPal Low Profile Disc Turntable is in a class by itself because of the unique low (7/8") profile; so low it can be loaded with a pallet jack! The heavy-duty components that make up this industrial duty turntable means it will take the abuse of demanding applications. Southworth turntables will provide years of maintenance - free and trouble - free service.

- **Low 7/8" silhouette >>>>** Compact design minimizes useable working height for pallet jack accessibility
- **Round design - no corners >>>>** The universal round turntable eliminates the need for detents, stops and "home" position
- **Full diameter baseplate >>>>** Most manufacturers use a small "one-size-fits-all" baseplate. Southworth maximizes a full diameter baseplate to maximize the spread across the load bearings; it means less deflection and greater stability even under eccentric loads
- **Protected load bearings >>>>** Perimeter seal around turntable helps retard dirt and foreign material from getting into load bearings
- **Oversized center pin >>>>** The oversized alloy center pin will take the abuse when loading or off loading
- **Lubricated-for-life center pin >>>>** The unique dry lubricated Teflon lined bushing provides smooth precise centering control
- **One year parts & labor warranty >>>>** One of the strongest warranties in the industry - backed by reputation
