

Wire Security Partitions & Cages Specification Guide

www.cisco-eagle.com/barriers

It doesn't have to be complicated...

Cisco-Eagle publishes fully-illustrated, priced fast to order units on our website, www.cisco-eagle.com. You can also submit a customized partition inquiry there for a lightning-fast quotation. We can help you toll-free over the telephone.

Hardware

Hardware: Partitions are built with durable 3/8" hardware. Once installed, the hardware is not accessible from the exterior. Furthermore, the panel's all welded construction, combined with the posts welded base plates, provide unequaled strength and security.

Wire Mesh Panels

Panels: panels are 1' to 10' wide, and 4' or 5' high. Full height partition walls are built by stacking two or more panels between standard posts. It's configured for a standard 3-1/4" sweep-space, with posts that project 2" above the panels. Standard panels can be used in ceilings or walls. Flush to the floor partitions can be made by modifying the post's standard hole

layout. Panels are constructed of 10 gauge (.135) steel wire, woven into 2" x 1" rectangular mesh and securely welded to a 1-1/4" x 1 1/4" x 1/8" steel angle frame. Frames have 7/8" x 7/16" slotted holes for mounting to posts and adjacent panels. Panels 4 to 7 feet wide have one 1/4" x 3/4" stiffener welded to the frame. Wider panels have two stiffeners.

Ceilings, Posts, & Windows

Ceilings are the same panels as walls. They do not bear loads. Clear spanned up to 35'. Large ceilings supported by 2" square horizontal ceiling tubes. Add a ceiling to an existing partition without changing layout.

Posts are made of 2" x 2" x 14-gauge (.083) steel tubing. Base plates of 2" x 7" x 1/4" steel flat with two 7/16" round holes for floor anchoring, are welded to each. A decorative cap is tack welded to the top.

Windows: You can add service windows to increase the functionality of your partition. The lockable, slide-up window locks tight when unattended. Window opening: 24" wide x 20" high. Shelf size: 24" wide x 18" deep x 10 gauge. Shelf height: 42 1/4" off of floor level. Panel size: 4'-0" wide x 8'-0" high; transoms extend height to 10' or 12'. Counter balanced, hinged, or mechanically operated windows in various sizes are available.

Doors

Hinged Doors: 3' or 4' wide by 7' -3 1/4" high opening. Transom panel sized to match partition height. Doors equipped with three 4" x 4" 10-gauge tight pin hinges. Padlock lugs standard, cylinder locks available. Complete with two door posts and hardware. Universal construction, works for left or right hand, inside or outside swing. Dutch Doors are the same as Hinged Doors, except that they have two separate operating door leafs. Bottom leaf locks with padlock, cylinder lock available. Top leaf locks to bottom with spring bolt. 10-gauge shelf, 18" deep x door width fixed to bottom leaf. Must specify hand and swing of door.Double Hinged Doors available in 6' or 8' wide. They are 7'-3-1/4" high; transom panel sized to match partition height. Inactive leaf secured by cane bolt (base) and chain bolt (top). Padlock lugs standard, cylinder lock available. Complete with two door posts and all hardware. Custom size and no overhead obstruction doors available. Sliding Doors come in 3, 4', 5', 6', 8', or 10' widths and full-height openings of 8' 0" or 10' 0". Padlock lugs standard, cylinder lock available. Complete with two door posts, two 4-wheel trolley trucks, 16 gauge track and all hardware. Universal construction, works for left or right hand, inside or outside. Custom size sliding doors are available. If the size or type of gate needed for your application is not listed above, contact us. We satisfy the most demanding requirements, and have many standard designs for special applications on file.

Wall & Floor Requirements:

Walls: Your facility wall must be able to accommodate wall or ceiling panels to utilize 2 or 3 sided partitions without at-wall post connections. 4-wall partitions are freestanding and do not need to be anchored to a building wall. One wall partitions typically have posts at each end, but may be ordered without them if your wall surface is sufficient. Posts at the wall are recommended for dry wall, gypsum, or metal walls. Panels may connect directly to masonry, block, and some wood walls without additional posts. Adding posts at the wall will increase the price of your partition. We can help you ensure you get the right configuration when you order.

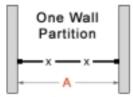

Floors: Partitions are designed to be anchored into a concrete floor. If your floor is uneven or a surface that cannot receive anchors, contact us for assistance. Partitions can be installed on most any floor that can bear their weight, and we can help you avoid problems with your floor surface. Seismic Zones: Special footplates may be required for certain seismic zone areas. If you are in one of these areas, please let us know so we can configure your partition correctly. This may result in a pricing adjustment.

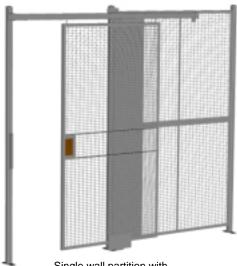

One-Wall Wire Partitions

Single wall partition with sliding gate

- (1) Dimensions listed illustrate the enclosed space. Actual dimensions of the enclosure will be slightly (2" to 8" depending on overall size) larger.
- (2) Standard hole pattern allows a 3-1/4" sweep space gap at the bottom of the panel. You can specify a flush to the floor partition; call us for details.
- (3) Special length posts available up to 40' long.
- (4) Wire panels available in standard widths from 1' to 10'.
- (5) Ceilings are not standard with one wall partitions. Contact us if your application requires one.
- (6) Options available: service windows, vertical rise gates, tunnel doors, double hinged doors, dutch doors. Other sizes, configurations available. Call us for details.
- (7) Adjustable sheet metal panels are available to adjust partitions widths from 1" to 12".

- (1) Dimensions listed illustrate the enclosed space. Actual dimensions of the enclosure will be slightly (2" to 8" depending on overall size) larger.
- (2) Standard hole pattern allows a 3-1/4" sweep space gap at the bottom of the panel. You can specify a flush to the floor partition; call us for details
- (3) Special length posts available up to 40' long
- (4) Wire panels available in standard widths from 1' to 10'.
- (5) Ceilings are not designed to bear weight.
- (6) Options available: service windows, vertical rise gates, tunnel doors, double hinged doors, dutch doors. Other sizes, configurations available.
- (7) Adjustable sheet metal panels are available to adjust partitions widths from 1" to 12".

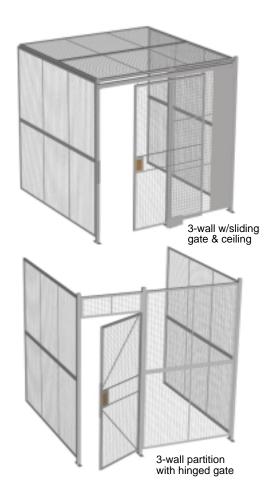

Three-Wall Wire Partitions
