

# FlexExtend

Flexible and Extendable Conveyor

Portable and extendable, Ashland Conveyor's Skatewheel FlexExtend is a great solution for moving product in retail, fulfillment, manufacturing, and shipping environments.

Low Cost Conveyance Flexibility

## KEY FEATURES

### FLEXIBLE

Flexible to convey around obstacles. The FlexExtend can be curved up to 180 degrees.

### EXTENDABLE

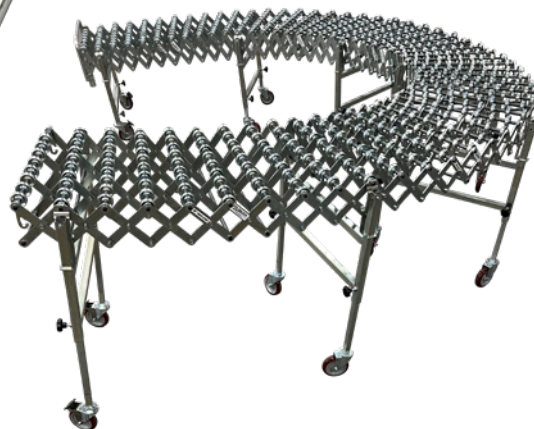

Can be extended and collapsed as required to fit your conveying needs.

### SELF-TRACKING

The individual skate wheels allow product to self-track when maneuvering around a curve.

### FLOW-ABILITY

The steel skate wheels rotate and flow more easily than rollers, allowing for less slope. Optional polymer wheels provide even greater flow-ability.

**ASHLAND** CONVEYOR  
PRODUCTS

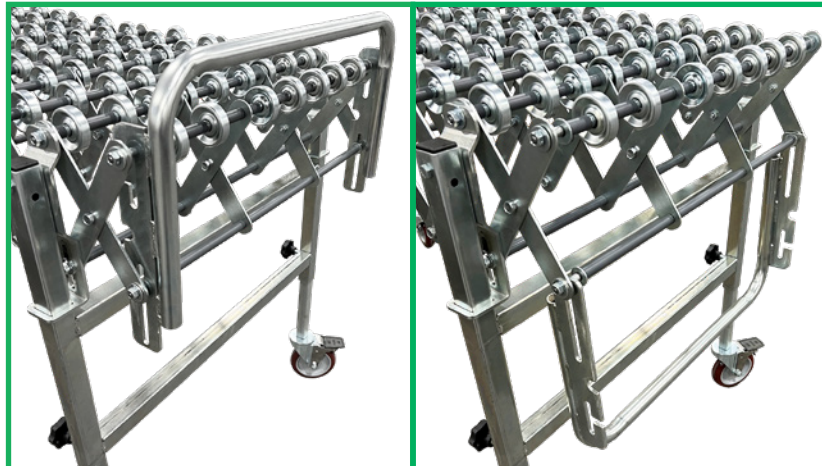

Legs constructed of two welded crossbraces for durability and longevity

Adjustable leg height

Locking 5" casters on both ends

Collapsible combination handle and package stop
