

KEG FLOW RACK Models KEGFLOW & VARIABLEWIDTH

Save space and allow for faster and easier handling of craft kegs. Bluff's Keg Flow racks easily install into existing pallet racking. Two designs available to accommodate any racking layout and craft keg sizes; all-welded single piece and variable width.

KEGFLOW (Welded)

- Designed for Sixer Kegs
- Fits pallet racking depths up to 120"
- Fully-Welded construction
- Requires pallet racking to be offset, higher in the back for gravity flow
- Safety Orange powder coat finish
- Made in the USA
- **Worksheet Required** to receive custom design

VARIABLEWIDTH (Non-Welded)

- Variable Width design fits keg sizes 21"-24" tall
- Fits pallet racking depths up to 60"
- NO pallet racking offset required, incline is built into Keg Flow design to allow for gravity flow
- Lightweight & smaller dimensions mean reduced shipping costs
- No tools required for assembly
- Steel Construction
- Safety Orange powder coat finish
- Made in the USA
