

FLEXI-BIN®

Take Control of Your Small Inventory Stock.

Flexi-Bins are a tried and true, economic way to store items ranging from electrical components, small parts, tools and hardware to literature, binders and small boxes. The shallow shelf depth of 12" keeps small items in sight. The sliding dividers and modular design allow you access to small parts and storage items instantly and easily. Sliding dividers adjust horizontally, and self-locking shelves can be raised and lowered without disturbing shelf contents for even greater time saving convenience. Flexi-Bins standard white back panels improve picking visibility and efficiency. Optional trim panels are available for a finished appearance. Install Flexi-Bins as stand-alone units or in back-to-back rows. Today, Flexi-Bins are a favorite among auto part stores, distribution outlets and retail operations. For improved inventory control and organization it's impossible to beat the functionality and value of Flexi-Bins.

08702-829	Post Foot Angle

Flexi-Bins used along with a bar coding system helps give accurate, up-to-date inventory control. This provides customers with a faster, more enjoyable experience with your parts department.

INSTALLATION EXAMPLES

Originally designed for automotive parts departments, Flexi-Bins are sturdy enough to support a second level.

Available Flexi-Bin drawers (dividers optional) are equipped with a backstop that prevents accidental removal.

Automotive parts are stored properly in Flexi-Bins, catalog #FB101.

Flex-Bins shelving capacity of 150 lbs. per shelf allows for great versatility in the products that can be stored on these systems.
