# MATERIAL HANDLING SYSTEMS INTEGRATION AUTOMATION TO OWN THE OUTCOME

## HIGHER PRODUCTIVITY, LOWER COSTS

Distribution, manufacturing and warehousing are inherently chaotic. You need control of processes, equipment, personnel, space and time. When do things get done? How effectively? How many people does it take to do them? How many interactions? How can you know? Good systems design helps you understand the answers and build solutions that drive productivity and lower costs.

## CENTURIES OF EXPERIENCE

Cisco-Eagle is a material handling systems integrator. We've been in business since 1970 and have completed thousands of successful projects for hundreds of companies in 50 states and many international locations. We help companies create efficient material flow systems that deliver tangible results.

## INNOVATIVE SOLUTIONS

### Conveyor Systems

You need materials to flow correctly and quickly. We provide optimized case and pallet conveyor systems, sortation and specialized conveying solutions.

### PLC Controls & HMI

Our Systems Technology Group programs and fabricates UL508A 24, 120, 480 volt power controls for material handling automation.

### Carousel Picking

High-density carousels are fast and efficient for goods-to-person picking, packing and order fulfillment operations.

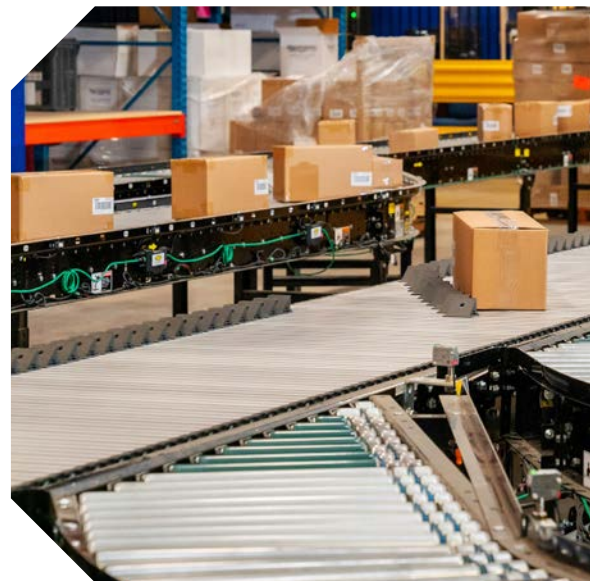

### Light-Directed Picking

Indicator modules mounted to storage equipment help pickers identify the right locations and quantities to make picks faster than tickets ever could.

### Pick Modules & Mezzanines

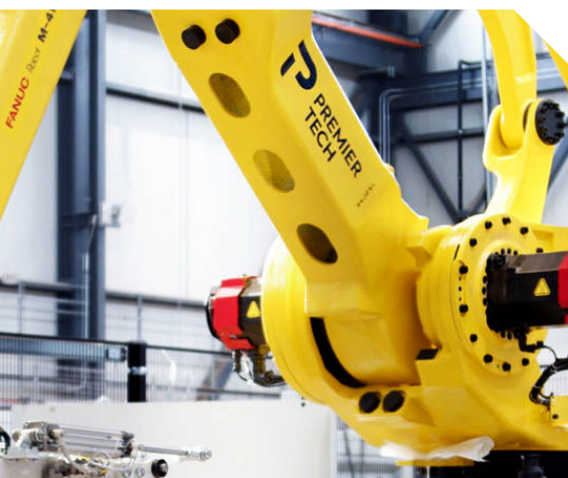

Pick modules integrate various storage solutions inside multi-level work platforms that move product efficiently through a distribution facility.

*"With a unique combination of large-company resources and a nimble way of thinking, we're the right size. Over five decades of successful automation implementations with hundreds of repeat customers make us a trusted partner."*

**Chris, Employee-Owner,  
Systems Technology Group**

## Partnership

Many customers have trusted us to implement their projects for decades. We deliver value for the long term and become a reliable partner.

## Experience

Cisco-Eagle has hundreds of years of combined systems integration experience across its teams. We have executed thousands of projects over five decades.

## Implementation

You can count on our project managers. The process ties subcontractors, shipments, equipment and various elements into a cohesive, high-performance system.

## Innovation

We work in teams. We challenge each other to find ways to make our clients' systems perform better and create lasting value—today, tomorrow and in a decade.

## TANGIBLE RESULTS

- Minimize errors, increase pick rates
- Increase throughput and reduce labor costs
- Power through seasonal swings, spikes and load shifts
- Optimize your ability to add new product lines
- Enhance your customer service experience

# WE ARE YOUR TRUSTED PARTNER

“

*“You can count on us from the first concept to the last bolt. We handle all the subcontractors, shipments and installers necessary to execute complex turnkey projects that make you more efficient, faster and safer. You’ll do more with less because you’re dealing with one company, uniquely qualified to take your business to the next level—today and into the future.”*

”
