

NEW!

KitBin[®] Pallet

For Your Toughest Applications

Engineered for the toughest applications in manufacturing, food processing, and distribution, the new KitBin Pallet from Decade Products is constructed to handle dynamic loads of up to 4,000 pounds, with a static load capacity of up to 13,200 pounds. Reusable and recyclable, the KitBin Pallet can also reduce your material handling and transportation costs.

Additional features include:

- Smooth surfaces for easy cleaning—no splinters or wood chips
- Single piece, high-density polyethylene (HDPE) construction—stands up to heavy loads and continuous use
- All materials USDA approved for food processing applications
- Extreme temperature resistance—resists UV degradation
- Standard 48" x 40" GMA footprint
- Four-way forklift entry
- Custom colors available
