

## BOX PALLET TYPE 1000

1000  
BOX PALLET TYPE

### *The Unique Super Performance Bin*

- One-piece injection moulded bin that provides great strength and resistance to damage from impact
- HDPE structural foam
- Available in solid or perforated
- For all types of powders, liquids, granulated materials
- Fully recyclable
- Easily customised
- Excellent performance for extreme temp. -40°C up to 60°C
- UV radiation resistant
- Long life span

# BOX PALLET TYPE 1000

## Features

Super performance box pallets manufactured from structural foam high density polyethylene.

Available in standard sizes as well as customised to meet your exact requirements.

Our rigid boxes are a one-piece moulding in materials that provide great strength and resistance to impact damage - even at low temperatures.

Base reinforcement ribs and side walls linked to column corner posts, allow safe stacking up to eight high with a total load of 4 tonnes.

Resistant to chemical corrosion and Ultra-Violet rays, our box pallets are light enough for easy handling and feature anti-slip stack location points.

## Colours

## Anti-slip Corners

A unique stacking system with inter-lock positioning plugs that give you the safety of stacking up to 8 boxes high.

## Integrally Injected Runners

Uniquely designed "built-in" plastic runners are injected integrally during the production process.
