

Close Quarters LIDAR Solutions

Protects against collisions between pedestrians and vehicles. Sensors are triggered only when a pedestrian or vehicle passes through detection field in a single specified direction.

Features

LED SAFETY SIGN: Sensor unit triggers a high visibility single sided or double sided LED safety sign warning of pedestrian traffic.

PERSONNEL PROTECTION: Warns vehicle operators of pedestrians crossing its travel path.

PLUG & PLAY: Sensor and LED safety sign are paired in factory for easy plug and play installation.

WIRELESS: Sensor sends wireless signal to Activate LED safety sign.

Pedestrian/Vehicle Single Direction Sensor

Product #: LED-1X-LIDAR-WARNING-24S (single sided sign)

Product #: LED-1X-LIDAR-WARNING-24D (double sided sign)
