

A photograph showing a soldier in camouflage uniform working in a modern, automated storage facility. He is standing at a workstation, interacting with a large metal shelving unit that contains various military equipment like helmets and gear. The facility is clean and well-lit. In the background, another soldier is partially visible. The Hänel logo is visible on the equipment and the wall. A "DANGER" sign is on the wall, and a "Do not enter Danger to life" sign is on the shelving unit.

GOVERNMENT STORAGE SOLUTIONS

Hänel Storage Systems has redefined the idea of operational efficiency using premium automated storage solutions to organize and protect US military assets for over 35 years

MAXIMUM STORAGE CAPACITY, MINIMUM SPACE

Hänel Lean-Lift®

Vertical Lift Module

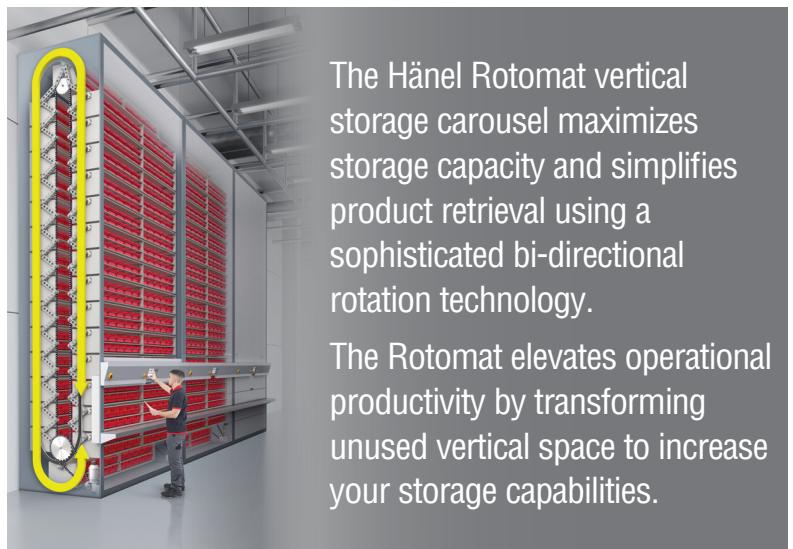

The Hänel Lean-Lift vertical lift module maximizes storage capacity and simplifies product retrieval by using available vertical space to retrieve and organize stored goods using an elevator principal to deliver them to the operator.

The Lean-Lift maximizes your workspace your workspace without expanding your physical footprint.

Hänel Rotomat®

Vertical Carousel

The Hänel Rotomat vertical storage carousel maximizes storage capacity and simplifies product retrieval using a sophisticated bi-directional rotation technology.

The Rotomat elevates operational productivity by transforming unused vertical space to increase your storage capabilities.

BUILT TO PROTECT AMERICA'S ASSETS

From inventorying consumables and maintenance equipment to modernizing and streamlining efficiency in logistics and issuing facilities, Hänel machines are trusted to manage some of the US government's most precious assets.

AVIATION TOOL STORAGE

OPERATIONAL EQUIPMENT STORAGE

MEDICAL SUPPLY STORAGE
