

List of Components - 3X100-KIT

Conveyor Guard Kit - 100 ft

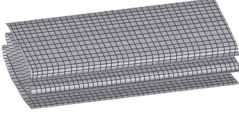

The installation kit includes one length of safety netting, cabling with termination hardware and system anchors.

Unpack hardware and net. Check all components against the packing slip for description, quantity, and lengths before proceeding with installation.

Check the netting for any cuts or tears. Contact your distributor if anything is missing, not to length, or if any portion of the safety net system is damaged. Do not substitute any hardware or net material.

Your components may differ in appearance from those pictured on this page. This is for reference and basic identification only.

Quantity	Part Number	Description	Image
