

CONVEYOR GUARD KITS (3X100-KIT)

Conveyor guard safety nets keep workers safe from injury, protect inventory from damage and reduce loss of production time due to spillage.

Made from high tenacity polypropylene (HTPP), the square mesh is highly resistant to abrasion and is lightweight. Knotless manufacturing eliminates the stresses of stitched construction found in conventional web nets. Conveyor Guard Kits may be installed on new or existing conveyor systems.

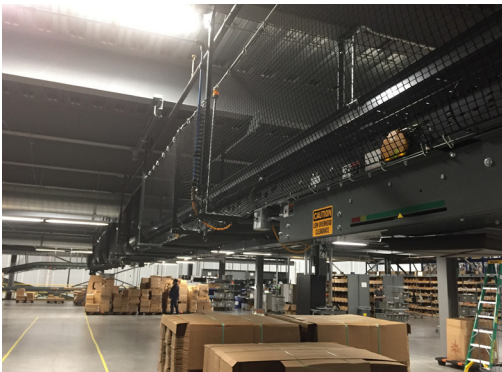

Conveyor Guard Kits are available in two lengths: 50' and 100' long.

- Net Material: High Tenacity Polypropylene (HTPP)
- Size: 3' x 100'
- Net Color: Black

FEATURES AND BENEFITS

- Will Not Corrode, Rust, Peel, or Dent
- Meets OSHA Standards
- Lightweight and Durable
- Easy Installation
- Net Capacity: 500 ft. lb.
