

# Panther Inox Plus

## - benefits and features

### Great durability = low costs

- \* Quality everywhere (choice of material, tolerances, construction) = minimum wear
- \* AISI 316L acid-resistant steel for chassis (no rust in case of scratches)
- Pump cylinder in stainless steel
- AISI 304 for all other steel components
- Bearings in the push rod and bushings are bronze
- Strong construction
- Very corrosion resistant
- \* Pump unit with special oil
- \* Many options for lubricating
- \* Key sketch of components available on the internet

### Lifting performance = user-friendly and efficient

- \* Ergonomically correct handle
- \* Permanent quick lift: Only two pump strokes and the pallet truck is ready to operate
- \* Close tolerances = low noise level
- \* Continuous product development = lifting performance for the customer
- \* Low own weight
- \* Short overall measurements = small space requirements
- Large turning angle

### High flexibility

- \* Many options on lengths and widths
- \* The lowered height can be adjusted
- \* Tailor-made solutions are an option

### Optimum hygiene

- \* Specially designed for easy cleaning
- \* Closed forks (at fork wheels)
- \* Less components
- \* Less welding seams
- \* Less places for dirt deposit
- \* Hoop skates – only one in each side
- \* Pins are removed, replaced by a through axle

Features marked with \* are unique for the Logitrans products
