

Foam Drawer Liners

Available for all Lista drawer sizes.
Complete kits available in
3 popular drawer dimensions.

Missing tools easy to spot on yellow bottom liner

Tools and components protected from
movement and contact

Customized to hold exactly the tools you store

Top foam liner available in thickness of 1" or 1/2"

Lista's shadowed foam drawer insert liners are the perfect solution for protecting, identifying and controlling valuable inventory. Using a 2-layer insert system, the upper blue foam liner cushions and protects your tools and components in perfectly-shaped cut-outs, while the bottom yellow foam liner makes it easy to spot when a tool is missing from the drawer.

This shadow system is the preferred means of controlling item location for the military, as well as in aviation repair, racing, museum artifact storage, storage of calibrated tools in industry, storage of auto dealer special tools, and many other applications.

Lista's foam drawer liners meet the specifications for FOD/FOE Tool Control Programs.

Inserts can be ordered in three different ways.

1. **Self-cut liner kits** for individual cabinets can be ordered as shown on the back of this flyer.
2. **Individual self-cut liners** for situations where you are outfitting a variety of drawer sizes.
3. **Custom-cut liners** for outfitting multiple drawers holding identical tooling. We will design, cut and label the inserts for your specific tool storage requirements.

Prices based on quantity ordered. Please contact your Lista representative.

Other Options

- We can custom cut foam liners for you. We will then design, cut and label the inserts for your specific tool storage requirements.
- Technical grade foam inserts are available for medical, crime lab or archival storage/museum applications. This foam does not off-gas, and can be sterilized.
- Please call **1-800-820-4830** for further details on any of these options.

Regardless of an item's outline, you can create a perfect shadow of its shape.
