Completely integrated and modular, Lista's Arlink® 8000 workstations and Arlink® 7000 workbenches ensure that you'll always have the exact workstation your work demands. Their enduring adaptability means that you'll have a cost-effective solution for all of your workstation needs, both today and in the future.

From single workbenches to complete facility-wide installations, the Arlink 8000 and 7000 systems' architecture enables users to create productive workstation environments for almost any person performing almost any task. Lista Arlink workstation systems serve a wide variety of applications in the workplace:

- assembly
- repair
- service
- light manufacturing
- labs
- clean rooms
- office operations
- R&D
- test and calibration

Arlink 8000 workstations and Arlink 7000 workbenches share many common components and accessories, which increase flexibility in use and reduce the cost of ownership. Sound ergonomic principles are incorporated in the design of all Arlink 8000 and 7000 products, minimizing fatigue and strain while insuring increased productivity.

Our ergonomic and adaptable systems are designed to enable easy customization of individual workstations and fast configuring of complex, multi-station systems.

Lista's Arlink 8000 Workstations and Arlink 7000 Workbenches

ARLINK® 8000 MODULAR WORKSTATION SYSTEMS

With their easy reconfigurability, Arlink 8000 workstations can be altered for multiple functions as well as changes in your workflow.

MAXIMUM RETURN ON INVESTMENT. Arlink 8000 workstations' unique column design provides a sturdy, flexible backbone for your evolving needs. Thanks to the system's versatility and durability, this exceptional series of workstations pays for itself quickly, while providing continuous value for years to come.

EASE OF ASSEMBLY. The Arlink 8000 offers the industry's fastest and simplest set up and reconfiguration. Virtually no hardware or tools are required, making changes free of mistakes and frustration.

LOW-COST CONVERSION. With its interchangeable modular parts, the Arlink 8000 can be custom configured to suit a range of applications at a lower cost than competitive workstations.

ERGONOMICS. With an emphasis on ergonomics throughout its design, the Arlink 8000 improves comfort, eliminates wasted motion, minimizes fatigue and strain, and reduces workplace injuries.

To order Arlink 8000 workstations, see pages 8-27.

Ease of flexibility when positioning system components is a hallmark of Arlink 8000 workstations.

ARLINK® 7000 WORKBENCH SYSTEMS

Arlink 7000 workbench systems let you tailor traditional workbenches to your needs while providing greater versatility than conventional workbenches. These efficient, ergonomic workbenches significantly improve productivity and maximize use of floor space. Select a stationary or mobile workbench, and choose from our extensive selection of accessories to design a workbench that exactly suits your requirements.

HEAVY DUTY QUALITY. Arlink 7000 workbenches' heavy-duty construction is capable of supporting 1,000 lbs. (454 kg), evenly distributed. Six heavy-duty worksurfaces are available.

ADJUSTABLE HEIGHT. Arlink 7000 workbenches include leg extenders, which allow the user to adjust the height of the worksurface from 30" to 36" in 2" increments.

EXTENSIVE ACCESSORIES. Above- and below-worksurface accessories enable you to customize your workbenches to meet your precise needs. With the addition of our VSI (Vertical Space Integrator) System, Arlink 7000 benches can take advantage of the entire family of Arlink 8000 accessories.

To order Arlink 7000 workbenches, see pages 28-34.

Arlink 7000 workbenches offer high weight-bearing capacity and flexible design.

Product Features

CLEAN ROOM COMPATIBILITY

Arlink® 7000 and Arlink® 8000 products may be configured for use in Class 10,000 clean rooms per the USA Federal Standard 209E and Class 7 per ISO 14644 International Clean Room Standard. Contact your Lista distributor or representative for details.

STATIC CONTROL

Industry demands and standards require workbenches that provide a static safe environment for the control of static electricity. One of the cardinal rules for ESD prevention is to make sure that all workers who handle ESD sensitive components are grounded. This is frequently accomplished by wearing a grounded wrist strap or by grounding through footwear to the floor.

Our static dissipative laminate worksurfaces are manufactured to have a specific amount of conductivity. This controls the discharge of any charged conductor brought to the workbench. A ground bolt through the worksurface makes contact with the conductive layer of the laminate providing a path to ground. For users of worksurface materials that come in contact with highly sensitive devices, it is recommended that an ESD mat kit be used in conjunction with a dissipative laminate.

We welcome the opportunity to discuss your individual ESD program. From our extensive ESD product portfolio our technical staff can select and recommend appropriate products for you to evaluate and test to ensure your selection is the correct product for your ESD program.

PAINT COLORS

All Arlink 7000 and Arlink 8000 product steel parts and accessories come in Light Gray (LG) or Sand (SN), in durable powder coat finish. Other colors can be quoted on request. **Please specify color choice with all orders.**

ACCENT TRIM COLORS

Accent trim for support columns, lights, steel shelves and footrests (included with each Arlink 8000 workstation, and with VSI Accessory System support columns and accessories) is available in a choice of contemporary colors. **Please specify trim color choice with all Arlink 8000 and VSI orders.**

Sand	Blue	Teal	Dark Blue
Burgundy	Light Gray	Royal Blue	Black
Bright Blue	Classic Blue		

Worksurfaces

Arlink® 7000 workbenches and Arlink® 8000 workstations are available with a choice of durable worksurfaces, appropriate for any task or use.

STANDARD LAMINATE WORKSURFACE

Worksurface is constructed of medium density particle board covered on top and all sides with non-glare matte finish plastic laminate. The front edge is contoured for comfort and chip resistance. The under side of the worksurface is sealed with a plastic tension sheet to prevent moisture absorption, warping and shedding.

- Laminate is dove gray when used with Light Gray workstations.
- Laminate is antique white when used with Sand workstations.

STATIC DISSIPATIVE LAMINATE WORKSURFACE

Worksurface is the same as the standard laminate worksurface, but with non-glare matte finish plastic laminate that provides a controlled path to ground for the dissipation of static electricity. The worksurface is provided with a grounding kit that must be used to provide proper protection for components and personnel. Static dissipative value for the material is $10^6 - 10^9$. (See photo on facing page).

- Laminate is dove gray when used with Light Gray workstations.
- Laminate is almond when used with Sand workstations.

BUTCHER BLOCK WORKSURFACE

Worksurface is satin finish hardwood ash with squared edge.

LISTA TOP WORKSURFACE

Wood core sandwiched by sanded oil-resistant pressed wood on the top and bottom. Available for Arlink 7000 workbenches only.

STAINLESS STEEL WORKSURFACE

Lista top with durable, heavy-gauge stainless steel cover that is fitted over top and sides of wood core.

GALVANIZED STEEL WORKSURFACE

Lista top with durable, heavy-gauge galvanized steel cover that is fitted over top and sides of wood core.

MATERIAL TRANSFER WORKSURFACES

Material transfer worksurfaces offer a cost-effective, efficient means of workflow management for products or pallets in assembly, repair and rework environments.

Through the use of pop-up balls, pop-up pads, insert wheels, or insert rollers, worksurfaces are customized to accommodate the transfer needs of your product and process. Material transfer worksurfaces are often a lower cost alternative to conveyors and can greatly improve the efficiency, safety and ergonomics associated with working on and moving a product. The unique ability to integrate Lista's Arlink components and accessories such as task lighting, wire and steel shelving, drawers and cabinets provides unsurpassed flexibility.

Material transfer worksurfaces may be integrated with all Arlink 8000 and Arlink 7000 module sizes, worksurface depths and materials. Please contact your Lista representative for help in configuring a system and providing the solution best suited to your requirements.

NOMINAL WORKSURFACE THICKNESS

Worksurface	Arlink 8000	Arlink 7000
standard laminate	1" (2.5 cm)	1 3/8" (3.5 cm)
static dissipative laminate	1" (2.5 cm)	1 3/8" (3.5 cm)
butcher block	1 1/4" (3 cm)	1 3/4" (4.5 cm)
Lista top	NA	1 3/4" (4.5 cm)
stainless steel	1" (2.5 cm)	1 7/8" (4.75 cm)
galvanized steel	1" (2.5 cm)	1 7/8" (4.75 cm)

Design Services and Product Selection

Our software shows plan views, elevations, bills of materials, and multiple, alternate configurations.

Lista's goal is to provide our customers with exceptional value through a combination of excellent products and an emphasis on service that make specifying, procurement, installation, and use of our products simple and satisfying. We can provide you with any of the following services or design a custom support program tailored just for you.

DESIGN SERVICES

Lista will help you with the layout of your facility, and will design workstations specific to your needs through the use of our state-of-the-art software tools. We can also lay out your entire facility to scale, either using your supplied CAD drawings, or by creating depictions of your rooms according to dimensions you provide. Our software will allow you to easily examine plan views, elevations, bills of materials, and multiple, alternate configurations.

By experimenting with various design solutions, the optimal configuration can be visualized before finalizing your order. This will ensure the best solution for your present application while considering your future needs. Our software presents various "what if" scenarios and lists of system components required for any variety of layouts or configurations. Ask your Lista representative for a demonstration today.

CUSTOM SOLUTIONS

When a solution other than our standard products is required, Lista will modify an existing standard part, or provide custom design and fabrication services. We have designed solutions to meet needs in such applications as labs, computer and LAN furniture, electronic assembly and many more. We will also work with you or your other suppliers to integrate Arlink® 7000 workbenches and Arlink® 8000 workstations with other equipment or furnishings in your plan.

TECHNICAL SUPPORT

Lista offers superior product support through an extensive network of representatives and distributors. Our large and growing network provides support for Lista customers virtually everywhere they locate or replicate operations.

SELECTING THE WORKBENCH SOLUTION THAT EXACTLY MEETS YOUR NEEDS

In choosing the workstation or workbench solution that best suits your application and future needs, consider these questions:

- Is reconfigurability important to your needs? If so, the Arlink 8000 system is an ideal starting point. Do you need heavy-duty construction and a high weight-bearing capacity? Then the Arlink 7000 family is the solution for you.
- Stationary or mobile workstation? Sitting or standing work (see examples below)? Select the type, size and height that best meets your needs.
- Customize your workstation by making selections from our extensive offering of workstation accessories.
- If you need assistance selecting your workstation, laying out a room, department, or facility, or defining the best accessories for the task, contact Lista at 800-722-3020, or visit www.listaintl.com.

Sitting

30.5" worksurface height will accommodate 99.5% of all male and 99.9% of all female workers.

Standing

Determine optimal worksurface height depending on the type of work being performed.

A Multitude of Configuration Options

FLOOR SPACE UTILIZATION

Arlink® 7000 workbenches and Arlink® 8000 workstations enable you to achieve maximum productivity per square foot. Our workstations can be designed in numerous configurations to meet any application. You can configure your workstations to suit your needs today, and as future needs evolve.

Many workstation configurations may also be ordered with mobile capabilities, enabling you to quickly and easily re-locate entire workstation groupings.

Please contact your Lista representative for additional configuration options.

Y Configuration

CONVEYOR WORKSTATION

The Arlink 8000 family of conveyor workstation systems provides cost-effective, high-efficiency workflow management throughout your entire production stream, between automatic machines and in operations including:

- manual assembly areas
- inspection
- testing
- rework
- packaging

Systems are available with single- or multi-level conveyor or easily integrated with the conveyor of your choice.

Select from Arlink 8000 workstation options to best optimize work flow management, including worksurfaces and accessories (task lighting, power, air and data beams, open wire shelving and parts bin racks, etc.).

Single sided – operator faces conveyor with standard worksurface

Double sided – operator faces conveyor with scalloped worksurface

Double sided – operator faces conveyor with standard worksurface

Double sided – operator at 90° to conveyor with standard worksurface

The Uniquely Configurable Arlink® 8000 Workstation

Arlink 8000 workstations are designed to allow the greatest user flexibility possible. Through the use of our unique Definite Positioning System™, numerous footprint configurations, and easy-to-assemble Starter and Adder modules, you can easily adapt and reconfigure your workstations as your needs evolve.

DEFINITE POSITIONING SYSTEM

An innovative assembly concept which features one Macro and two Micro slots on each side of a high strength column, this approach greatly reduces the time and effort needed to attach components to the system, while making highly efficient use of space. This unique column design maximizes accessory density and placement options. Since columns are double sided, a single column may be used by two back-to-back workstations, as well as adjacent modules.

Brackets fit into either Micro slots (above) or Macro slots (below).

Macro slots, located in the center of the column, provide support for heavy-duty components, such as work-surfaces and shelving. In the case of adjacent workstation modules, the Macro slot is utilized by both to save space and reduce system cost. Components that attach to the Macro slots are vertically adjustable in 3" (8 cm) increments.

Micro slots provide support for lighter-duty components, such as power beams and parts bin rails. Micro slots are located to the left and right of the Macro slot, and provide maximum component placement options, with vertical adjustment in 1" (2.5 cm) increments.

Arlink® 8000 Workstation Features and Benefits

SIMPLICITY

- Fast, easy assembly.
- With our Starter and Adder system, workstations can easily link to create infinite layout options.
- Workstations can be converted from single- to double-sided at any time – quickly, easily and inexpensively.

MODULARITY

- Five standard module lengths – 30" (76 cm), 36" (91 cm), 48" (122 cm), 60" (152 cm) and 72" (183 cm) – can be mixed and matched to suit your needs.
- Three column heights – 54" (137 cm), 72" (183 cm) and 84" (213 cm) – other heights available upon request.
- Full column height can be used to attach worksurfaces, shelves or other accessories.
- Both sides of column may be used to attach accessories or create double-sided workstations.

STRENGTH

- Made of high strength, cold rolled steel, the system's columns provide maximum structural integrity.
- Meets all applicable ANSI-BIFMA standards.

ADAPTABILITY

- Definite Positioning System™ allows easy, secure placement and reconfiguration of accessories.

MOBILITY

- Mobile workstations and mobile companion cabinets are easily relocated, allowing fast layout changes.

SECURE STORAGE

- Hanging drawers, overhead cabinets and/or companion cabinets can be added anywhere you need them to provide secure storage for valuable tools, equipment, parts or personal effects.

ELECTROSTATIC CONTROL

- Electrostatic control products and accessories are available to meet most ESD-related requirements.

VISIBILITY

- Task lighting at each station provides illumination for the most exacting work.

AESTHETICS

- Contemporary appearance – all components are powder coated in attractive standard Light Gray or Sand, with other colors available on request.
- Select from ten standard trim colors to suit your decor or designate a particular department or function.

Easy-Order Arlink® 8000 Workstations

A-SS (SINGLE-SIDED STARTER)

Includes:

- 1 Starter assembly (see page 12)
- 1 footrest
- 2 outriggers
- 1 worksurface assembly
- 1 single-sided power beam (15 amp)
- 1 open wire shelf, 12" depth
- 1 light fixture assembly
- 1 parabolic light diffuser

A-SA (SINGLE-SIDED ADDER)

Includes:

- 1 Adder assembly (see page 12)
- 1 footrest
- 1 outrigger
- 1 worksurface assembly
- 1 single-sided power beam (15 amp)
- 1 open wire shelf, 12" depth
- 1 light fixture assembly
- 1 parabolic light diffuser

A-SC (SINGLE-SIDED CORNER ADDER)

Includes:

- 1 Adder assembly, 36"
- 1 outrigger
- 1 corner worksurface assembly
- 1 single-sided power beam (15 amp)
- 1 open wire shelf, 12" depth
- 1 light fixture assembly
- 1 parabolic light diffuser

A-DS (DOUBLE-SIDED STARTER)

Includes:

- 1 Starter assembly (see page 12)
- 2 footrests
- 4 outriggers
- 2 worksurface assemblies
- 1 double-sided power beam (15 amp)
- 2 open wire shelves, 12" depth
- 2 light fixture assemblies
- 2 parabolic light diffusers

A-DA (DOUBLE-SIDED ADDER)

Includes:

- 1 Adder assembly (see page 12)
- 2 footrests
- 2 outriggers
- 2 worksurface assemblies
- 1 double-sided power beam (15 amp)
- 2 open wire shelves, 12" depth
- 2 light fixture assemblies
- 2 parabolic light diffusers

A-DC (DOUBLE-SIDED CORNER ADDER)

Includes:

- 1 Adder assembly, 36"
- 2 outriggers
- 2 corner worksurface assemblies
- 1 double-sided power beam (15 amp)
- 2 open wire shelves, 12" depth
- 2 light fixture assemblies
- 2 parabolic light diffusers

The Easy-Order workstation modules shown on this page are pre-configured to include the most popular and versatile styles of Arlink 8000 workstations we offer. To design a custom workstation to suit alternate configurations, see pages 12-13.

Arlink 8000 workstations consist of a Starter module, and as many Adder modules as you need for your application.

Choose from single- or double-sided Starters, Adders, or Corners in all standard module lengths and heights. You may also select either 28"- or 30"-deep worksurfaces in either standard laminate or static dissipative material. Easy-Order modules include all accessories shown in the charts to the left. To order additional accessories, please see pages 14-25.

To configure an Easy-Order Arlink 8000 workstation module

Follow the 5 steps below for Starter module and repeat for each Adder module.

- Choose Easy-Order module configuration:

A-SS (single-sided Starter)

A-SA (single-sided Adder)

A-SC (single-sided Corner Adder)

A-DS (double-sided Starter)

A-DA (double-sided Adder)

A-DC (double-sided Corner Adder)

- Choose module length*: **30** (30"/76 cm), **36** (36"/91 cm), **48** (48"/122 cm), **60** (60"/152 cm) or **72** (72"/183 cm)

**corner adders 36" long only*

- Choose module height*: **54** (54"/137 cm), **72** (72"/183 cm), or **84** (84"/213 cm)

**54" high modules do not include light assemblies*

- Choose module depth: **28** (28"/71 cm) or **30** (30"/76 cm)

- Choose worksurface material: **SL** (standard laminate) or **SD** (static dissipative)

- Choose powder coat paint color: **LG** (Light Gray) or **SN** (Sand)

Example: to order a **Starter single-sided workstation module** that is 60" long, 84" high and 30" deep with a standard laminate worksurface and a light gray finish, the part number would be **A-SS608430SLLG**.

To order an **Adder single-sided workstation module** that is 48" long, 84" high and 30" deep with a standard laminate worksurface and a light gray finish, the part number would be **A-SA488430SLLG**.

To order an **Adder single-sided corner module** that is 84" high and 30" deep with a standard laminate worksurface and a light gray finish, the part number would be **A-SC368430SLLG**. (When ordering an "L" shaped configuration, 2 Starters must be used with a Corner Adder.)

How to determine the number of Starter, Adder and Corner Easy-Order modules in a workstation configuration:

PLEASE SPECIFY PAINT COLOR FOR ALL ORDERS - LIGHT GRAY (LG) OR SAND (SN)

Arlink® 8000 Worksurface Assemblies

WORKSURFACE ASSEMBLY

Worksurface is constructed of 1" (2.5 cm) thick medium density particle board covered on top and all sides with non-glare matte finish plastic laminate. Under side is sealed with a plastic tension sheet to prevent moisture absorption, warping and shedding. Assembly includes threaded steel inserts, 2 worksurface support brackets and 2 worksurface support beams.

See page 5 for details.

For integrated material transfer workspaces, see page 5.

STATIC DISSIPATIVE LAMINATE WORKSURFACE

Plastic laminate provides a controlled path to ground for the dissipation of static electricity. Provided with a grounding kit. Static dissipative value is 10^6 - 10^9 .

For grounding kit, see page 25.

For details and other work-surface materials, see page 5.

CORNER WORKSURFACE

Construction is the same as other workspaces. Length is 36" (91 cm). Assembly includes required brackets.

PENINSULA WORKSURFACE

Mounts on standard 36" (91 cm) module with support leg at front.

WORKSURFACE SUPPORT LEG

Adjustable from 28" (71 cm) to 34" (86 cm) high.

SPLIT BAY WORKSTATION

Split bay workstation spans 2 modules with 1 worksurface. Select worksurface assembly equal to the length of the combined modules. Select a split bay bracket to join worksurface assembly to center column.

Build-Your-Own Arlink® 8000 Workstations

Designing a custom Arlink 8000 workstation is a simple and straightforward process. Start by selecting the structural elements (Starter and Adder assemblies), add outriggers, choose a worksurface, and add the accessories that fulfill your needs.

In addition to the column heights shown, columns can be custom cut to any size you request. Modules in any combination of sizes may be joined to create lines of unlimited length.

1. SELECT STARTER ASSEMBLY

The Starter Assembly is the first component for each workstation and includes 2 columns with outer and inner trim, and a closed stabilizer panel. Optional open stabilizer panel may be ordered for full access from the rear of the workstation (add the prefix "O" to the part number).

2. SELECT ADDER ASSEMBLIES

The Adder Assembly for each adjoining module includes a single column with outer and inner trim, and a closed stabilizer panel. Optional open stabilizer panel may be ordered for full access from the rear of the workstation (add the prefix "O" to the part number).

3. SELECT OPTIONAL COLUMN CAP

Gray plastic cap finishes off top of column. Comes included with all 54" (137 cm) high Starter and Adder Assemblies.

4. SELECT OUTRIGGERS

See charts to right for uses.

8044 for worksurfaces 28"-32" deep and shelving 20"-22" deep

8040 heavy-duty, for worksurfaces 28"-32" deep and shelving 20"-22" deep

8042 for shelving 12"-18" deep

8041 for worksurfaces 34"-36" deep

8043 for rear of single-sided applications, to increase stability

5. SELECT WORKSURFACE ASSEMBLY – SEE PAGE 11

6. SELECT ACCESSORIES – SEE PAGES 14-25

Column Height	Module Length				
	30" 76 cm	36" 91 cm	48" 122 cm	60" 152 cm	72" 183 cm

Build-Your-Own Arlink® 8000 Mobile Workstations

All Arlink 8000 modules can be ordered in a mobile format, providing for easy relocation and smooth rolling of workstations, flow racks, or carts.

Designing a custom Arlink 8000 mobile workstation is a similar process to designing a stationary workstation. Start by choosing a base (either single-sided or double-sided), select structural elements (Starter and Adder assemblies), choose worksurface(s), and add the accessories that fulfill your needs. Maximum worksurface depth for mobile workstations is 30". In addition to the column heights shown, columns can be custom cut to any size you request. Modules in any combination of sizes may be joined to create lines of unlimited length.

Single-sided Starter

Double-sided Starter

Single-sided Adder

Double-sided Adder

1. SELECT MOBILE STARTER BASE

Base consists of mobile base frame, 2 swivel 4" locking and 2 swivel 4" non-locking casters, mobile outriggers and all required hardware. Single-sided base is 34" (86 cm) deep; double-sided base is 54" (137 cm) deep.

2. SELECT MATCHING STARTER ASSEMBLY

The Starter Assembly includes 2 columns with outer and inner trim and a closed stabilizer panel. Optional open stabilizer panel may be ordered for full access from the rear of the workstation (add the prefix "O" to the part number).

3. SELECT MOBILE ADDER BASE

Base consists of mobile base frame, 1 swivel 4" locking and 1 swivel 4" non-locking caster, mobile outrigger(s) and all required hardware. Adder bases must always be mounted on the right-hand side of a single-sided Starter base.

4. SELECT MATCHING ADDER ASSEMBLY

The Adder Assembly for each adjoining module includes a single column with outer and inner trim and a closed stabilizer panel. Optional open stabilizer panel may be ordered for full access from the rear of the workstation (add the prefix "O" to the part number).

5. SELECT OPTIONAL COLUMN CAP – SEE P. 12

6. SELECT WORKSURFACE ASSEMBLY – SEE P. 11

Maximum worksurface depth is 30" for mobile workstations.

7. SELECT ACCESSORIES – SEE PP. 14-25

Shelves, Shelf Accessories, Overhead Cabinet

OPEN WIRE SHELF

Welded steel wire shelf has chrome plated finish. Adjusts vertically in 3" (7.5 cm) increments and adjusts horizontally 15° and 30°. Includes front lip (can be oriented up or down). Weight capacity 150 lbs. (68 kg). Mounts in Macro slots.

LAB STYLE WIRE SHELF

Lab Style wire shelves are 9" deep to accommodate normal-sized work boxes and sample trays. They have cross wire welded on underside of shelf, so work boxes slide easily along length of shelf when front lip is facing up. Weight capacity 150 lbs. (68 kg). Mounts in Macro slots.

WIRE SHELF DIVIDER

Shelf divider snaps into place. For open wire shelf only.

STEEL SHELF

Sturdy steel shelf adjusts vertically in 3" (7.5 cm) increments and adjusts horizontally 15° and 30°. Weight capacity is 300 lbs. (136 kg). Includes color trim (color matches column trim). Mounts in Macro slots.

STEEL SHELF DIVIDER

Shelf divider mounts on shelf with 2 screws. 8" (20 cm) tall.

STEEL SHELF LIP

Shelf lip mounts to front of shelf and can be positioned at height of either 5/8" (1.5 cm) or 1 1/2" (4 cm).

Panels

PEGBOARD PANEL

Sturdy painted steel pegboard panel, ideal for hanging tools, etc. Mounts in Micro slots. 18" (46 cm) high.

Length	Part No.
30" (76 cm)	8333
36" (91 cm)	8334
48" (122 cm)	8335
60" (152 cm)	8336
72" (183 cm)	8337

LOUVERED PANEL

Sturdy painted steel louvered panel designed to hold plastic bin boxes, tool or supply holders. Mounts in Micro slots. 18" (46 cm) high.

Length	Part No.
30" (76 cm)	8442
36" (91 cm)	8443
48" (122 cm)	8444
60" (152 cm)	8445
72" (183 cm)	8447

REVERSIBLE MARKERBOARD/TACKBOARD

Two-sided reversible board. Features white magnetic markerboard on one side and gray fabric tackboard on the other. Also functions as privacy panel and sound dampener. Mounts in Micro slots. 30" (76 cm) high.

Length	Part No.
30" (76 cm)	8771
36" (91 cm)	8772
48" (122 cm)	8773

MODESTY PANEL

Steel or fabric-covered modesty panel is typically positioned above the worksurface, and acts as a privacy screen. Steel panels can be used as fill-in panel or magnet panel to hold instructions or drawings. Fabric-covered modesty panel acts as tack board and sound dampener. Standard fabric color is gray. Other colors available on request.

Utility Accessories

HORIZONTAL POWER BEAM

Available in single- or double-sided configuration. Each side has 8 receptacles, lighted power switch and 15 amp or 20 amp breaker. Mounts in Micro slots. Includes 7 1/2' power cord.

POWER BEAM WITH LIGHT SWITCH

Available in single- or double-sided configuration. Provided with separate on/off switch for light which allows remainder of beam to be left powered. 7 outlets per side. 15 amp standard. Mounts in Micro slots. Includes 7 1/2' power cord.

VERTICAL POWER STRIP

Available in 15 amp or 20 amp, and GFCI. Lighted on/off switch, 6' cord with grounded plug and circuit breaker included. Painted black. Mounts vertically to front and back of Micro slots. Bracket and hardware supplied.

DATA BEAM

Modular data beams feature 4 duplex-style outlets with 8 ports that accept modular snap-in/snap-out jacks or connectors for data, video, or audio connectivity. Beams come with outlets, but jacks/connectors must be purchased separately. On-site wiring for ports is responsibility of customer. Contact Lista for additional specifying assistance.

AIR BEAM

Air beam is supplied with:

- (1) 1/4" NPT female inlet on top
- (3) 1/4" NPT female outlets on front (single-sided) and (3) 1/4" NPT female outlets per side (double-sided)
- (2) end mounted jumpers

Mounts in Micro slots.

AIR SUPPLY BRACKET

Supplied with (1) 1/4" NPT female outlet. Mounts under worksurface to worksurface support beam.

Hanging Drawers

HANGING DRAWER ASSEMBLY

Steel drawer mounts under worksurface, and can slide to any horizontal position. Includes steel ball bearings, recessed handles and drawer stops. 100% full extension. Each drawer comes with a lock and each assembly comes with 2 keys, except as noted. Includes mounting brackets.

Drawer	Height	Part No.
1 drawer	6 1/4" (16 cm)	8841
1 drawer (shallow)*	3" (8 cm)	4850
2 drawer	13" (33 cm)	8844
3 drawer	19 1/2" (50 cm)	8843
box/file drawer	19 1/2" (50 cm)	8842

*no lock available

PELICAN® DRAWER

Secure storage for legal hanging files or personal effects, plus segmented tray for supplies. Allows easy clearance for user's knees. Thermo-formed polystyrene body with polyurethane drawer face. Mounts under worksurface, and can slide to any horizontal position. Includes concealed ball bearing slides and locking system.

W x D	Height (Front)	Height (Back)	Part No.
19 1/2" x 24" (50 x 61 cm)	2 1/4" (6 cm)	10" (25 cm)	8845

TOTE BOX WITH HOLDER

Slides into tote box holder which mounts under worksurface, and can slide to any horizontal position. Comes with tote box holder and hangers.

W x D x H	Part No.
11" x 17" x 6" (28 x 43 x 15 cm)	8998

TOTE BOX WITH PULL-OUT WORKSURFACE

Similar to tote box with holder but with additional 10" (25 cm) x 24" (61 cm) pull-out work surface. Weight capacity of 75 lbs.

W x D x H	Part No.
11" x 17" x 8" (28 x 43 x 20 cm)	8850

For companion stationary and mobile drawer storage cabinets, see page 35.

Tool Accessories, Footrests

TOOL GLIDE TRACK AND TROLLEY ASSEMBLY

Smooth-moving glide keeps electric and pneumatic tools properly positioned. If used in conjunction with fluorescent light assembly, glide track mounts on brackets for fluorescent lights. If used alone, mounting brackets must be ordered separately (see below).

Length	Part No.
30" (76 cm)	8958
36" (91 cm)	8975
48" (122 cm)	8976
60" (152 cm)	8633
72" (183 cm)	8728

Description	Part No.
tool trolley only	8184

MOUNTING BRACKETS

Used to mount tool track when a light fixture assembly is not used or needed. Come in pairs.

Depth	Part No.
14" (36 cm)	8199
19" (48 cm)	8196
26" (66 cm)	8182

TURBO TRAY

Molded of durable plastic with 24 compartments. Rotates on heavy-duty ball bearing. Not static dissipative.

Diameter	Height	Part No.
30" (76 cm)	4 1/2" (11 cm)	8510

SWIVEL FOOTREST

Drops into slots on 8044 and 8041 slotted outriggers. Adjustable to suit worker at individual benches. Includes color trim.

Length	Part No.
30" (76 cm)	8885
36" (91 cm)	8911
48" (122 cm)	8910
60" (152 cm)	8610
72" (183 cm)	8710

FREESTANDING FOOTREST

Ergonomic footrest is height adjustable from 3" (8 cm) to 12" (30 cm). Platform is 15" (38 cm) deep by 21 3/4" (55 cm) wide. Adjusts 0 to 25°. Includes ribbed rubber mat.

Swing Arm System

UNIVERSAL BRACKET

Standard hinge-type bracket 8420 is made of cast zinc aluminum alloy. Mounts in Macro slots and is vertically adjustable in 3" (8 cm) increments.

Heavy-duty bracket 8423 is welded steel. Bolts through column and is vertically adjustable in 3" increments.

Description	For Swing Arms	Part No.
standard	8408, 8416, 8410	8420
heavy duty	8410	8423

SWING ARM

Cast 8" and 16" swing arms can be linked together in various combinations to achieve desired length. When 8" and 16" arms are linked, load capacity is 20 lbs. (9 kg). Contact your Lista representative for other combined load capacities.

Tubular swing arm is 18" overall length. Weight capacity is 75 lbs (34 kg). Can mount left or right. Requires universal bracket for mounting (see above).

Size	Load Capacity	For Brackets	Part No.
cast 8" (20 cm)	60 lbs. (27 kg)	8420	8408
cast 16" (41 cm)	40 lbs. (18 kg)	8420	8416
tubular 18" (46 cm)	75 lbs. (34 kg)	8420, 8423	8410

MONITOR SHELF WITH KEYBOARD HOLDER

Holds computer monitor. Includes retractable wire keyboard holder. Requires universal bracket, ordered separately (see above).

Description	W x D	Part No.
monitor shelf with keyboard holder	12 3/8" x 12 3/8" (31 x 31 cm)	8878
optional mouse tray	9 1/2" x 7 5/8" (24 x 19 cm)	8895

Optional mouse tray attaches to monitor shelf with keyboard holder. Holds mouse/mouse pad.

**PLEASE SPECIFY PAINT COLOR FOR ALL ORDERS –
LIGHT GRAY (LG) OR SAND (SN)**

ACCESSORY SHELF

For easy access to small tools, instruments, parts, etc. Ribbed mat optional (see below). 75 lb. (34 kg) capacity. Requires universal bracket, ordered separately (see page 22).

RIBBED RUBBER MAT

Mat fits accessory shelf. Provides soft, slip resistant surface.

PARTS BIN RACK

Holds industry-standard plastic parts bins (not included). Requires universal bracket and 8410 swing arm, ordered separately (see page 22).

BIN CONTAINER

Holds 3 rows of parts bins for easy access to parts and components. Interior space per shelf is 20" (51 cm) x 6" (15 cm) deep. Top shelf is 3 1/4" (8 cm) high; second and third shelves are 3 3/4" (9.5 cm) high. Requires accessory shelf for support (not included – see above), or can be used freestanding. 50 lb. (23 kg) capacity. Does not include bin boxes.

PARTS BIN BOXES

Blue plastic bin fits in rack or on rail and slides to position. Conductive bin is black.

EQUIPMENT SHELF

Holds a variety of customer supplied equipment or tools. 75 lb. (34 kg) capacity. Requires universal bracket, ordered separately (see page 22).

DOCUMENT HOLDER

For displaying papers, plans, etc. Includes lip for pencils, pens, etc. Requires universal bracket, ordered separately (see page 22). Document holder 8918 also requires either 8408 or 8416 cast swing arm.

Arlink® 8000 Utility and Parts Carts

UTILITY AND PARTS CART

Single- or double-sided modular carts can be configured with any combination of shelves, parts bins, utility bins, etc. to meet your exact needs. All are constructed using Lista's standard Arlink 8000 column to allow complete interchangeability of components with workstations. 54" (137 cm) high. Carts feature 2 wheel-locking and 2 non-locking casters, 3 1/2" (9 cm) diameter. Wheels are rubber, non-marking. Maximum shelf depth for parts cart is 14" (36 cm).

For accessories for utility and parts carts, see pages 14-25.

Arlink® 8000 Flow Rack Workstations, Progressive Assembly Systems

Flow racks can be used to stage and deliver parts utilizing gravity, reducing material handling time and costs. Bins or totes are loaded on flow rack frames from the rear, and as operators remove one from the front, a new bin glides forward on rollers. Similarly, flow rack frames can be inclined away from an operator to allow removal of completed work.

Flow racks are constructed utilizing the same Starter and Adder system common to all Arlink 8000 workstations, and worksurface assemblies and accessories as shown in this catalog can be added to create a complete parts presentation and integrated workstation system. Ball transfer tables and other material handling worksurfaces (see page 5) or conveyors (see page 7) may also be integrated into the worksurface as needed, and flow racks can be made mobile by the addition of caster sets.

Flow rack modules may be joined side by side, using Starter and Adder assemblies to achieve any overall length and combination of module sizes.

Arlink 8000 flow racks modules are available in 4 standard lengths from 36" (91 cm) to 72" (183 cm).

Flow racks are height adjustable in 1" increments. The flow rack angle is adjustable.

FLOW RACK STARTER ASSEMBLY

Consists of 2 Starter assemblies, 2 outriggers, 1 flow rack assembly and 4 connectors.

L x D x H	72" High	84" High
36" x 48" (91 x 122 cm)	FRS3672	FRS3684

Arlink® 7000 Workbench Systems

Arlink 7000 Workbench Systems help companies like yours optimize performance in the workplace by providing efficient, ergonomic, and well-designed workbenches which significantly improve productivity, maximize use of floor space and produce a safer work environment.

SUPERIOR VERSATILITY

Arlink 7000 workbenches let you tailor your benches to your needs while providing greater versatility than competitive workbenches. Whether you select stationary or mobile, or choose from our extensive selection of accessories, you can design a workbench that exactly suits your requirements.

For drawer cabinet pedestal-based workbenches, see Lista's General Workbench and Workspace Solutions Catalog.

Arlink® 7000 Workbench Features and Benefits

HEAVY-DUTY QUALITY

- Heavy-duty construction is capable of supporting 1,000 lbs. (454 kg), evenly distributed.
- Durable worksurface choices include plastic laminate, static dissipative laminate, butcher block, stainless steel, galvanized steel and Lista top. See page 5 for worksurface descriptions.

HEIGHT-ADJUSTABLE LEGS

- Stationary workbenches include leg extenders, which enable the user to adjust the height of the work-surface from 30" to 36" (76-91 cm) in 2" (5 cm) increments.

CLEAN ROOM COMPATIBILITY

- Workbenches may be configured for use in Class 10,000 clean rooms per the USA Federal Standard 209E and Class 7 per ISO 14644 International Clean Room Standard.

STATIC ELECTRICITY CONTROL

- Static dissipative laminate worksurfaces, ESD mat kits and other static-safe accessories make your workbenches the perfect component in any static-dissipative environment. For ESD accessories, see page 25.

VARIETY OF ACCESSORY CHOICES

- Numerous above- and below-worksurface accessories allow you to customize your Arlink 7000 workbench to exactly suit your needs.
- Unique VSI (Vertical Space Integrator) System enables use of all Arlink 8000 accessories, greatly enhancing the versatility and utility of your workbench. See page 34 for details.

MOBILITY

- Mobile workbenches and mobile companion cabinets are easily relocated, allowing fast layout changes and easy cleaning.

SECURE STORAGE

- Hanging drawers and/or companion cabinets can be added anywhere you need them to provide secure storage for valuable tools, equipment, parts or personal effects.

The VSI System (see page 34) allows use of all Arlink 8000 accessories on Arlink 7000 workbenches.

WORKBENCH STYLES

Arlink 7000 workbenches are available in two styles: stationary and mobile. Simply choose the base style that best suits your needs.

- Add appropriate accessories from pages 31-34
- For worksurface descriptions, see page 5
- For optional hanging drawers, see page 32
- For companion stationary or mobile drawer storage cabinets, see page 35
- For other dimensions, please contact your Lista representative

ARLINK 7000 STATIONARY WORKBENCH

Includes stationary workbench frame (for description, see page 31). Nominal bench height is 30" (76 cm).

To configure an Arlink 7000 stationary workbench

- Choose bench length desired:
 - 48" (122 cm)
 - 60" (152 cm)
 - 72" (183 cm)
 - 84" (213 cm)
 - 96" (244 cm)
- Choose bench depth desired:
 - 30" (76 cm)
 - 36" (91 cm)
- Add 30 to denote 30" bench height
- Choose worksurface desired:
 - SL (standard laminate)
 - SD (static dissipative)
 - BB (butcher block)
 - SS (stainless steel)
 - ST (galvanized steel)
 - LT (Lista top)
 - NT (no top required)
- Choose powder coat paint color:
 - LG (Light Gray)
 - SN (Sand)

Example: to order a stationary workbench that is 72" long and 30" deep with a standard laminate worksurface and a Light Gray finish, the part number would be **723030SLLG**.

ARLINK 7000 MOBILE WORKBENCH

Includes mobile workbench frame (for description, see page 31). Nominal bench height is 36" (91 cm).

To configure an Arlink 7000 mobile workbench

- Choose bench length desired:
 - 48" (122 cm)
 - 60" (152 cm)
 - 72" (183 cm)
 - 84" (213 cm)
 - 96" (244 cm)
- Choose bench depth desired:
 - 30" (76 cm)
 - 36" (91 cm)
- Add 36 to denote 36" bench height
- Choose worksurface desired:
 - SL (standard laminate)
 - SD (static dissipative)
 - BB (butcher block)
 - SS (stainless steel)
 - ST (galvanized steel)
 - LT (Lista top)
 - NT (no top required)
- Add C to denote mobile/with casters
- Choose powder coat paint color:
 - LG (Light Gray)
 - SN (Sand)

Example: to order a mobile workbench that is 84" long and 30" deep with a static dissipative worksurface and a Sand finish, the part number would be **843036SDCSN**.

Arlink® 7000 Workbench Components

STATIONARY WORKBENCH FRAME

Includes 2 leg assemblies, 2 load beams, 1 stiffener, 1 set of 6" leg extenders and hardware. By using the leg extenders, the workbench height is adjustable from 30" (76 cm) to 36" (91 cm) in 2" (5 cm) increments. Load capacity for all benches is 1,000 lbs. (454 kg) evenly distributed. Nominal bench height is 30" (76 cm).

Workbench Length	Depth 30" (76 cm)	36" (91 cm)
48" (122 cm)	483030NT	483630NT
60" (152 cm)	603030NT	603630NT
72" (183 cm)	723030NT	723630NT
84" (213 cm)	843030NT	843630NT
96" (244 cm)	963030NT	963630NT

MOBILE WORKBENCH FRAME

Same construction as Arlink 7000 stationary workbench frame. Frame includes 2 mobile leg assemblies (with 4 swivel casters, 2 of which have wheel locks), 2 load beams, 1 stiffener and hardware. Nominal bench height is 36" (91 cm).

Workbench Length	Depth 30" (76 cm)	36" (91 cm)
48" (122 cm)	483030NTC	483630NTC
60" (152 cm)	603030NTC	603630NTC
72" (183 cm)	723030NTC	723630NTC
84" (213 cm)	843030NTC	843630NTC
96" (244 cm)	963030NTC	963630NTC

SKIRTING PANELS

Steel skirting panels enclose ends and back of bench.

Workbench D x H	Description	Part No.
30" x 30" (76 x 76 cm)	end panel	3030EM
36" x 30" (91 x 76 cm)	end panel	3630EM
48" x 30" (122 x 76 cm)	rear panel	4830RM
60" x 30" (152 x 76 cm)	rear panel	6030RM
72" x 30" (183 x 76 cm)	rear panel	7230RM
84" x 30" (213 x 76 cm)	rear panel	8430RM
96" x 30" (244 x 76 cm)	rear panel	9630RM

UNDER SHELF

For extra storage space under bench, this 18" (46 cm) deep lower steel shelf fastens to the leg braces. (A footrest is required with under shelf – see below.)

Workbench Length	Part No.
48" (122 cm)	7Z4818US
60" (152 cm)	7Z6018US
72" (183 cm)	7Z7218US
84" (213 cm)	7Z8418US
96" (244 cm)	7Z9618US

FIXED HEAVY GAUGE FOOTREST

Channel steel footrest mounts between horizontal leg tubes.

Workbench Length	Part No.
48" (122 cm)	7E48FR
60" (152 cm)	7E60FR
72" (183 cm)	7E72FR

Arlink® 7000 Above-Worksurface Options

RISER SHELF WITH BOX SUPPORTS

14" (36 cm) deep shelves are finished in either standard or static dissipative laminate to match specified worksurface. Steel box supports are 19" (48 cm) high and 11" (28 cm) deep.

RISER SHELF COLUMN SUPPORT

Column supports are 15" (38 cm) high and mount on 36" (91 cm), 48" (122 cm), 60" (152 cm) and 72" (183 cm) centers. These sturdy columns have a dual slot system to accept Arlink 8000 accessories (see pages 14-24).

ELECTRICAL PANEL INSERT FOR BOX SUPPORT

The panel insert includes illuminated 15 amp circuit breaker, 4 duplex receptacles and power cord. Electrical panels can be used on one or both shelf supports and can be purchased with shelf or added later.

HORIZONTAL POWER BEAM

Includes number of outlets shown in chart and 7 1/2' power cord. Mounts in Micro slots.

LIGHT FIXTURE FOR UNDER SHELF

Fastens to underside of riser shelf with wood screws. Includes acrylic diffuser, 7 1/2' power cord and rocker switch. Lights feature economical electronic ballasts and come complete with T8 fluorescent lamp.

BACK AND END STOPS

Steel stops fasten to worksurface to provide back and end stops. Stops extend approx. 4" above workbench top. End stops are 30" deep and have rounded front corners. Back stop can also be attached to riser shelf.

PLEASE SPECIFY PAINT COLOR FOR ALL ORDERS – LIGHT GRAY (LG) OR SAND (SN)

VSI (Vertical Space Integrator) System

TURN ANY WORKBENCH INTO A HIGH EFFICIENCY WORK CENTER

The VSI (Vertical Space Integrator) System is designed to expand the efficiency of Arlink® 7000 workbenches, as well as retrofitting to existing workbenches. You can create highly productive and efficient work centers by adding above-worksurface work aids such as task lighting, storage shelves, power beams, parts bin rails, etc.

With the VSI System, you're able to utilize the Arlink 8000 system's wide range of shelving and accessory options that easily attach to the vertical column without the need for tools.

The VSI System is available in 30" (76 cm), 36" (91 cm), 48" (122 cm), 60" (152 cm) and 72" (183 cm) wide modules, with a column height of 45" (114 cm). It is easily installed by in-house personnel and can be utilized as a single unit on a stand-alone bench, or linked together using our Starter/Adder system. VSI columns are double-sided, and one VSI may service two benches when benches are positioned back-to-back (see photo below).

Conversion and retrofit of existing workbenches is fast and easy. Uprights mount onto the surface of almost any existing workbench with the hardware kit provided.

To order, select an assembly from the charts below. VSI System width must be a minimum of 6" shorter than worksurface width. The VSI system has Micro and Macro dual slot mechanism on both sides of the upright columns (see page 8 for detailed descriptions).

VSI uprights and accessories mount onto any workbench worksurface to provide a complete accessory system. Mounted on a bench with a second bench positioned behind it (far right), the uprights and accessories can be shared between the two benches thanks to the VSI uprights' double-sided columns.

VSI (VERTICAL SPACE INTEGRATOR) SYSTEM

Features sturdy 45" (114 cm) high, roll-formed steel columns that fasten to the bench top and are stabilized by a modesty panel.

Starter assembly includes 2 columns, 4 trim strips, 1 modesty panel, and mounting hardware. Adder assembly includes 1 mounting column, 2 trim strips, 1 modesty panel and mounting hardware.

Trim strip color can be chosen from the chart on page 4.

For VSI system accessories, see pages 14-25.

COLUMN CAP

Optional gray plastic cap to finish off top of column. Order 1 per column used.

Lista Narrow Width (NW) Stationary and Mobile Companion Cabinets

Lista NW companion cabinets allow the storage of frequently-used tools, parts and files adjacent to your work area. These cabinets are ideal for the most demanding storage needs while providing easy access to the drawer interior. Companion cabinets are the perfect complement to an Arlink® 7000 workbench or Arlink® 8000 workstation, providing additional drawer storage. Mobile companion cabinets allow stored items to be shared among workstations.

- Select from 6 standard cabinet configurations in 4 different heights, or order your cabinet with a mobile base for additional flexibility. Our space-efficient cabinets all measure 16 7/8" (43 cm) wide x 28 1/2" (72 cm) deep. Mobile cabinets are mounted on 3 1/2" (9 cm) diameter casters (2 fixed, 2 swivel) with wheel locks, and include individual drawer latches on all drawers.
- Cabinets feature full height sidewalls and steel roller bearings. Drawers can be rearranged within the cabinet in any order you choose. Optional drawer partitions and dividers (see below) let you customize each drawer interior for additional organization of drawer contents.
- All cabinets come with a lock and 2 keys.
- Drawers have 150 lb. (68 kg) capacity and 95% extension. 11" (28 cm) high drawers store hanging letter files.

To order a cabinet, add your choice of powder coat paint color in place of the box: **LG** (Light Gray) or **SN** (Sand)

Lista Technical Electronic Workbenches

Featuring a sleek, aesthetically attractive design, the real beauty of Lista's technical electronic workbenches is their ability to perfectly suit the widest variety of applications. Lista's modular approach is the key to our technical benches' versatility, with flexible standard components and accessory options both above and below the work-surface.

Align™ Adjustable Height Workstations

The Align adjustable height workstation features 16" of travel between 25 1/2" and 41 1/2". Users can adjust the bench height with the simple turn of a crank, motor drive or via slide leg. Load capacity is 1,000 lbs. evenly distributed. Features advanced ergonomic design. Also available in mobile configuration.

Lista Industrial Workbenches

Rugged, durable, built to handle the harshest work environments. Lista's industrial workbenches feature flexible standard components and can be cost-effectively custom configured to meet the specific needs of your application.

Lista Packing and Shipping Workbenches

Lista's advanced, modular workbenches are specifically designed for packing and shipping applications. These flexible benches bundle together an array of superior features and accessories to suit almost any need.

Product specifications are subject to change without notice and are those in effect at time of order receipt.
