

Crash Barrier

Stop a four-ton forklift from doing four tons of damage.

Engineered from solid ductile iron and maintenance-free polypropylene, our Crash Barrier ensures heavy equipment doesn't stand a chance of damaging your walls or facility. Crash Barrier is also ideal for creating traffic lanes, framing off areas protecting columns and separating moving equipment from people.

All-angle Protection Absorbs direct impacts, deflects glancing blows

Zero Maintenance Install it once, get peace of mind for years

High Visibility Your best defense is being seen

Crash Barrier End

CB-K-END-307

Materials: Ductile Iron end & cap, rubber damper, anchor kit

Crash Barrier Post End

CB-K-PSE-307

Materials: Ductile Iron post end & cap, rubber damper, anchor kit

Crash Barrier Mid

CB-K-MID-307

Materials: Ductile Iron mid & cap, rubber damper, anchor kit

Barrier

CB-C-EXT-307

Material: Polyolefin, 10' (3 m) length

Crash Barrier Corner

CB-K-CNR-307

Materials: Ductile Iron corner & cap, rubber damper, anchor kit
