

Diameter Adapters Allow You to Handle Smaller Drums with the Same Drum Handler

Insert into Standard Drum Holder to Handle a Smaller Drum

Diameter Adapters insert simply and quickly into the drum holder in just a few seconds. With the hooks slightly above the drum holder, tilt the Diameter Adapter downward so that as the hooks engage the top of the drum holder band, it settles into place with its lower tabs protruding below the drum holder band. Your drum handler is now ready to handle the smaller drum size. To return to handling a 55-gallon (210 liter) drum, simply lift the adapter out of the drum holder.

Insert the correct size Diameter Adapter to handle each smaller drum. Diameter Adapters are available for sizes from 14" to 22" (35.6 to 55.9 cm) diameter.

These handy accessories allow a single Morse drum handler to handle various smaller drums. Inserting the Diameter Adapter reduces the grip diameter to match drums smaller than a standard

22.5" (57 cm) diameter 55-gallon (210 liter) steel drum. To return to handling a 55-gallon drum, simply lift the Diameter Adapter out of the drum holder.

Diameter Adapters for 17.5" diameter and smaller drums have brackets at top and bottom of drum that adjust to securely hold a drum from 15" tall, up to 38" tall.

Spark resistant and stainless steel Diameter Adapters available for same diameter ranges.

Note About Drums with Ribs: Because it is recommended that drums be held at their middle, proper size Diameter Adapter should be used only on a drum with at least 8" (20.3 cm) between the ribs.

Diameter Adapters are made in 1.5" (3 cm) diameter increments for common drum sizes.

Kontrol-Karrier with Model 55/30-16

Diameter Adapters Fit Many Morse Drum Handlers

Hydra-Lift Karrier with Model 55/30-16

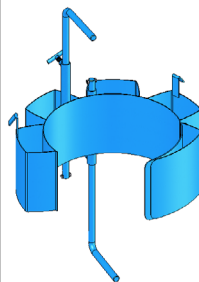

Forklift-Karrier with 55/30-16

Adapters without Brackets

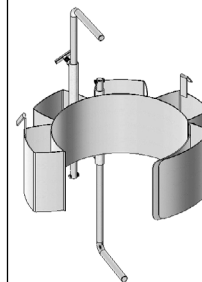

Diameter Adapters for drums from 18.5" to 22" in diameter do NOT have hold-down brackets. To safely handle a plastic or fiber drum, use in combination with the Bracket Assembly to prevent the drum from slipping.

Adapters with Brackets

Diameter Adapters for smaller drums from 14" to 17.5" in diameter have integrated hold-down brackets to prevent the drum from slipping lengthways through the drum holder. Bracket adjust for a drum up to 38" tall.

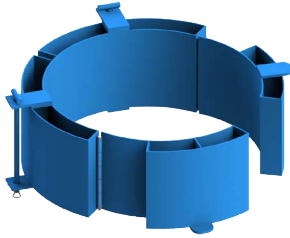

Stainless Steel Adapters

Stainless Steel Diameter Adapters available for same diameter ranges. Often used in food, pharmaceutical and chemical applications. Made of type 304 stainless steel with bead blast finish.

Model 55/30-19GR

Diameter Adapter for 19" (48.3 cm) diameter 30-gallon (114 liter) steel drum.

This Diameter Adapter is required for Morse models with 3-Piece Drum Holder to handle a 30-gallon drum, such as 185G, 285G, 185GR, or 285GR Series.

It can also be inserted into the MORCINCH Drum Holder.

Adapters for 3 Sizes of Rubbermaid Brute

These Diameter Adapters are designed to securely hold a Rubbermaid Brute container. The integrated top brackets prevent an inverted Rubbermaid Brute from slipping out of the drum holder.

Choose the correct size adapter for your container. Models are available for 3 different sizes of Rubbermaid Brute.
