

### Diameter Adaptors Allow You to Handle Smaller Drums with the Same Drum Handler

#### Insert into Standard Drum Holder to Handle a Smaller Drum

Diameter Adaptors insert simply and quickly into the drum holder in just a few seconds. With the hooks slightly above the drum holder, tilt the Diameter Adaptor downward so that as the hooks engage the top of the drum holder band, it settles into place with its lower tabs protruding below the drum holder band. Your drum handler is now ready to handle the smaller drum size. To return to handling a 55-gallon (210 liter) drum, simply lift the adaptor out of the drum holder.

Insert the correct size Diameter Adaptor to handle each smaller drum. Diameter Adaptors are available for sizes from 14" to 22" (35.6 to 55.9 cm) diameter.

These handy accessories allow a single Morse drum handler to handle various smaller drums. Inserting the Diameter Adaptor reduces the grip diameter to match drums smaller than a standard

22.5" (57 cm) diameter 55-gallon (210 liter) steel drum. To return to handling a 55-gallon drum, simply lift the Diameter Adaptor out of the drum holder.

Diameter Adaptors for 17.5" diameter and smaller drums have brackets at top and bottom of the drum. They adjust to securely hold a drum from 15" tall, up to 38" tall.

Spark resistant and stainless steel Diameter Adaptors are available for the same diameter ranges.

Note About Drums with Ribs: Because it is recommended that drums be held at their middle, proper size Diameter Adaptor should be used only on a drum with at least 8" between the ribs.

Diameter Adaptors are made in 1.5" (3 cm) diameter increments for common drum sizes.

Kontrol-Karrier with Model 55/30-16

#### Diameter Adaptors Fit Many Morse Drum Handlers

Hydra-Lift Karrier with Model 55/30-16

Forklift-Karrier with 55/30-16

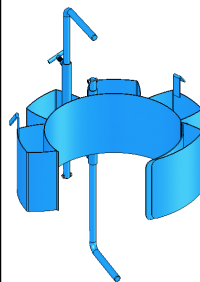

#### Adaptors without Brackets

Model 55/30-19  
shown

Diameter Adaptors for drums from 18.5" to 22" in diameter do NOT have hold-down brackets. To safely handle a plastic or fiber drum, use in combination with the Bracket Assembly to prevent the drum from slipping.

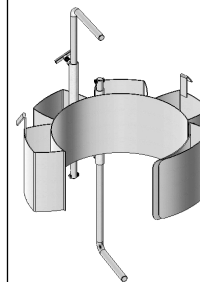

#### Adaptors with Brackets

Model 55/30-16  
shown

Diameter Adaptors for smaller drums from 14" to 17.5" in diameter have integrated hold-down brackets to prevent the drum from slipping lengthways through the drum holder. Bracket adjust for a drum up to 38" tall.

#### Stainless Steel Adaptors

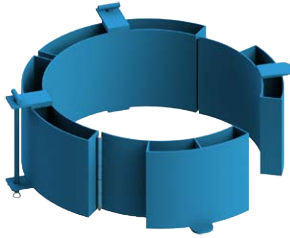

Model 55/30SS-16  
shown

Stainless Steel Diameter Adaptors are available for the same diameter ranges. They are often used in food and pharmaceutical applications.

**Model 55/30-19GR**

Diameter Adaptor for 19" (48.3 cm) diameter 30-gallon (114 liter) steel drum.

This Diameter Adaptor is required for Morse models with 3-Piece Drum Holder to handle a 30-gallon drum, such as 185G, 285G, 185GR, or 285GR Series.

It can also be inserted into the MORCINCH Drum Holder.

**Adaptors for 3 Sizes of Rubbermaid Brute**

These Diameter Adaptors are designed to securely hold a Rubbermaid Brute container. The integrated top brackets prevent an inverted Rubbermaid Brute from slipping out of the drum holder.

Choose the correct size adaptor for your container. Models are available for 3 different sizes of Rubbermaid Brute.
