

LP & HP Series Turntable Stretch Wrapping Systems

Flex turntable stretch wrappers are available in three configurations so you can be sure to find the right machine for your application.

Automatic

Flex A Series machines offer maximum efficiency and economy. Available in high or low profile models.

Deluxe

The Flex D Series is the semi-automatic workhorse of the industry. Available in high or low profile models.

Economy

The affordable LPE offers many of the same features as the D Series. Available in low profile model.

Flex A models eliminate the need for operators to attach and cut the stretch film. Simply place the pallet load on the machine, and pull a lanyard switch while backing away. The machine will perform the entire wrap cycle automatically without the need for an operator to tie the film tail to the load at the beginning of the cycle, and detach it at the end. This will greatly impact the efficiency of your stretch packaging operation by keeping your operators busy with other tasks while the machine is wrapping.

Flex Low Profile Automatic Performance Features

- Automatic Cycle Reduces Labor
- 15 RPM Variable Speed with 'soft-start'
- 5,000 lb. Maximum Load Weight Capacity
- Economical 260% Powered Film Pre-stretch
- 63" Diameter Turntable for Loads up to 50"x50"
- Max Load Height 80" Standard, 110" Optional
- Load via Pallet Jack*, Electric Walkie* or Forklift
- AC/VFD Motors Reduce Maintenance
- Full Surround Deck Protects Turntable
- Structural Steel Frame for Durability
- Easy to Load Film From Side
- Forklift Portable from Front or Rear

A precision ring bearing and Orion's DuraGlide cams provide reliable support for loads weighing up to 5,000 pounds.

* Optional ramp required for pallet jack, electric walkie loading

Flex High Profile Automatic Performance Features

- Automatic Cycle Reduces Labor
- 15 RPM Variable Speed with 'soft-start'
- 5,000 lb. Maximum Load Weight Capacity
- Economical 260% Powered Film Pre-stretch
- 48"x48" Turntable for Loads up to 50"x50"
- Max Load Height 80" Standard, 110" Optional
- Octagonal Turntable for Easy Forklift Loading
- AC/VFD Motors Reduce Maintenance
- Structural Steel Frame for Durability
- Easy to Load Film From Side
- Forklift Portable from Front or Rear

Turntable support on the Flex HPA provided by a precision ring bearing for maximum durability.

Control Panel HMI on D & A models

A versatile touch screen display guides users through a range of menu items for easy adjustment of operating parameters. Settings can be password protected for added security.

Flex models use an industrial grade woven belt carriage lift for long service life and reliability. Orion's "drop lock" system prevents carriage movement in the unlikely event of belt breakage.

Flex stretch wrapping machines help you reduce material costs, labor costs and because they're so well built, your true cost of ownership.

Flex machines are built rock solid

All Flex models are built from heavy gauge structural and formed steel to assure a long lasting, durable machine. For convenience, all machines are forklift portable from either the front or rear of the machine. Mounting tabs are provided for easy lagging to the floor if desired.

Orion Insta-Thread™ film carriage and film tail treatment mechanism on Flex LPA (top) and Flex HPA (bottom).

Orion Insta-Thread™ Film Delivery System

Film threading is fast, easy and safe thanks to simple "drop-in" film loading. Simply open the gate, drop the film tail in, and close the gate.

Graphic instructions on top of the carriage guide the operator through film threading.

PLC Controller

- Non-Proprietary PLC
- NEMA 12 Rated Control Box
- A models Include Lanyard switch for remote start
- Large E-Stop / Cycle Pause Button
- Power Lockout Disconnect Switch

Flex D models are the result of 25 years of experience building rugged, reliable semi-automatic stretch wrapping machines. Built for most demanding industrial environments, the Flex Deluxe Series features a durable steel framework, AC motors, a belt-driven carriage lift and a heavy-duty turntable support system. D and A Series machines include the 260% (standard) Insta-Thread film delivery system to assure you get the maximum power and economy out of every foot of stretch film you use.

Flex Low Profile Deluxe Performance Features

- 15 RPM Variable Speed with 'soft-start'
- 5,000 lb. Maximum Load Weight Capacity
- Economical 260% Powered Film Pre-stretch
- 63" Diameter Turntable for Loads up to 55"x55"
- Max Load Height 80" Standard, 110" Optional
- Load via Pallet Jack*, Electric Walkie* or Forklift
- AC/VFD Motors Reduce Maintenance
- Full Surround Deck Protects Turntable
- Structural Steel Frame for Durability
- Easy to Load Film From Side
- Forklift Portable from Front or Rear
- DuraGlide Support Bearings for quiet & reliable operation

* Optional loading ramp required. Above model shown with optional ramp

Flex A and D low profile models feature a heavy duty steel base with structural fork tubes that run the length of the machine. Turntable support provided by specially designed casters.

Flex High Profile Deluxe Performance Features

- 15 RPM Variable Speed with 'soft-start'
- 5,000 lb. Maximum Load Weight Capacity
- Economical 260% Powered Film Pre-stretch
- 48"x48" Turntable for Loads up to 55"x55"
- Max Load Height 80" Standard, 110" Optional
- Octagonal Turntable for Easy Forklift Loading
- AC/VFD Motors Reduce Maintenance
- Structural Steel Frame for Durability
- Ergonomically Friendly Design
- Forklift Portable from Front or Rear
- 8 Heavy-Duty Turntable Support Casters

Flex HPD high profile offers reliable chain drive, a heavy duty steel frame and 8 industrial casters for turntable support.

Feature for feature, dollar for dollar, Orion Flex stretch wrappers offer you more value than any competitive machine on the market today.

State-of-the-art Controller Technology

From its clean and simple user interface on the outside to its sophisticated programmable logic controller and AC variable frequency drives inside, every aspect of the Flex control package has been designed for maximum reliability, flexibility and ease-of-use.

Optional Heavy Duty Ramp for Easy Loading via Electric Walkie or Pallet Jack

An optional Flex loading ramp can be placed in any one of three loading positions: right, left or center. Flex LPA and LPD models feature a full surround deck around the turntable for added convenience when placing loads. Gradual turntable acceleration (soft-start) assures that light or unstable loads can be safely wrapped.

Orion Insta-Thread™ Film Delivery System

Flex A and D Series machines help you reduce cost with every load you wrap. With a standard film pre-stretch rate of 260% (higher than most competitive machines) you'll not only save money by using less film, the film on the load will be stronger, so loads are securely wrapped for storage or shipping.

For lower volume applications that demand year after year reliability, the Flex LPE is the affordable solution. Sharing many of the same control, safety and performance features as the rest of the Flex line, the LPE offers incredible value.

Flex Low Profile Economy Performance Features

- 12 RPM Variable Speed with 'soft-start'
- 4,000 lb. Maximum Load Weight Capacity
- Economical 200% Powered Film Pre-stretch
- 63" Dia. Turntable for Loads up to 55"x55"
- Max Load Height 80"
- Load via Forklift, Pallet Jack* / Electric Walkie*
- AC/VFD Motors Reduce Maintenance
- Structural Steel Frame for Durability
- Ergonomically Friendly Design
- Forklift Portable from Front or Rear
- DuraGlide support bearings for quiet & reliable operation

Insta-Thread™ LT Film Delivery System

The Flex LPE will help you reduce cost with every load you wrap. With a standard film pre-stretch rate of 200% you'll dramatically reduce the amount of stretch film needed to secure your loads as compared to wrapping by hand.

Film threading is fast, easy and safe thanks to simple "drop-in" film loading. Simply open the gate, drop the film tail in, and close the gate.

The LPE control panel features a touch panel operator interface, industrial grade start button and E-Stop switch and power lock out switch for enhanced safety.

Under the turntable, heavy duty steel frame-work and support casters assure a long and reliable service life.

Popular Flex Series Options

Contact your local Orion distributor for the best configuration for your application.

- Loading Ramp
- Oversize Load Configuration
- 30" Insta-Thread™ Film Carriage
- Insta-Cut™ Automatic Film Web Severance
- "Stretch & Weigh™" Scale Package
- Dual Turntable Option
- Extra Heavy Load Weight Capacity
- Environmental Options
- French or Spanish HMI Language

The dual turntable option increases efficiency by allowing simultaneous load staging and wrapping.
