EDGEHALT® LADDER SAFETY GATE (LSG)

The Safest Safety Gate

The new patent-pending EdgeHalt® Ladder Safety Gate is now the safest safety gate on the market. It has been tested to the OSHA, ANSI and Canada COHS standards and exceeds the loading requirement by two times. Plus, it features innovative Slam-Proof™ technology to close the gate in a quiet, controlled manner. The unique design of the EdgeHalt Ladder Safety Gate also features a wide range of adjustability - so much so that there are now just four gates covering a range from 15" to 50" with an adjustability of up to 10" per gate.

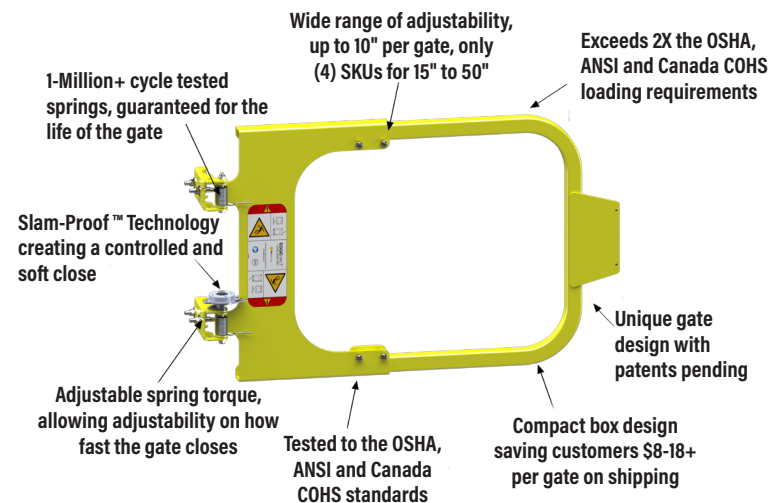

Slam-Proof™ Technology - A unique damping system that provides safety to the operator while the gate is closing.

Proven Safety For Your Team - Tested to the OSHA, ANSI and Canada COHS standards and exceeds the loading requirement by two times (OSHA 1910.29; OSHA 1910.28, ANSI A1264.1-2017; Canada COHS SOR-86-304 Part II; ANSI A14.3).

Springs Guaranteed For Life Of Gate - Tested to exceed more than one million cycles, you can feel good that the springs on your gate will likely outlast everything around them.

Always In Place - Self-closing to protect employees from dangerous falls.

Save On Shipping - The gate's unique design allows for a compact shipping box, reducing shipping costs by an average of \$8-\$18+ per gate.

Available in 3 Finishes - Powder Coat Yellow (PCY), Hot-Dipped Galvanized (GAL), 304 Stainless Steel Seal Welded (304SW)
