

What's Behind Your Curtain Wall?

At GG Distributing, it's Cold Beer.

Gary Steffey, general manager at GG Distributing, shares how he managed a growing business and accommodated different product standards for climate control.

What are a few of your cold storage challenges with beer?

Maintaining the cold chain and meeting suppliers' product requirements is an ongoing challenge. We view integrity of the cold chain as a shared responsibility and partnership. Each link plays a critical role in product freshness.

The explosion of craft beer, such

as New Belgium and Sierra Nevada, also required us to expand our distribution center. In order to meet craft beer's temperature requirements we needed to create a separate temperature-controlled area as craft beer has a lower storage temperature than case beer.

In searching for a new distribution facility, what were your top priorities?

Given the fact that we were moving into a leased facility, we were looking for an insulated curtain wall that would create temperature-controlled areas without impacting the structure of the facility. In

addition, the cost of a conventional wall system was prohibitive; we needed a thermal wall solution that would provide us superior temperature control at a fraction of the cost of a conventional wall.

You chose InsulWall® to retrofit your new distribution center - how has it impacted your business?

InsulWall allowed us to create a 9,000 square foot temperature-controlled room within our 55,000 square foot leased space quickly - installation was completed in one week. InsulWall also provided us flexibility to reconfigure the distribution center without structural impact to the leased space.

The real test has been whether

InsulWall can meet temperature requirements in the 100° plus east Texas heat. The air conditioning unit is actually cycling off each day after we complete movement of the product - proving to us that InsulWall holds the temperature at brewery standards and has exceeded our expectations for temperature control.

About GG Distributing

In 2012, bringing together over 140 years of wholesale alcohol distribution experience, Giglio and Glazer's formed GG Distributing. Today, successful brands such as MillerCoors, Crown, Heiken, Red Bull, and Diageo move through GG Distributing to retailers across the country.

About Randall Manufacturing

Randall Manufacturing has been providing innovative temperature zoning products to the logistics industry for over thirty years. Today, Randall Manufacturing is bringing its extensive temperature zoning experience, innovation and comprehensive capabilities to warehouses and facilities across the country.
