## HP-HP-SS-HE SERIES FLOOR SCALES

### Installation Options
**Add Versatility...**
- Indicator floor stand
- Digital weight indicators
- Pit frame
- Bumper guards

All installation options are available in mild or stainless steel.

### RoughDeck HE Standard Features/Options

- **Approvals:**
  - NTEP-certified, Class III 4000d
  - Measurement Canada Approved

- **Load Cells:**
  - Factory Mutual-approved
  - Alloy steel, nickel-plated

- **Stainless steel**
  - Welded seal
  - Stainless steel, hermetically sealed

- **Construction:**
  - Mild steel
  - 304 stainless steel

- **End Load Capacity:**
  - 10,000 lbs: 80% full scale
  - 5,000 lbs: 100% full scale
  - 2,000 & 5,000 lbs: 200% full scale

Why RoughDeck® is Simply the TOUGHEST, Most Accurate Floor Scale Available...

Before introducing our RoughDeck series, design engineers conducted a comprehensive floor scale testing program. They determined that two design factors—minimizing deck deflection and isolating load cells from extraneous forces—were key to low-profile scale accuracy and long life. As a result, the RoughDeck design concept provides outstanding strength and component protection.

Superior Structural Design

Unlike most other scales, the RoughDeck utilizes a full 6" structural channel frame welded to a durable steel deck, providing exceptional rigidity under severe loading conditions (typical of fork lifts and pallet jacks). This design has proven so superior that the RoughDeck carries a full 5-year warranty on the deck structure. The cross sections shown compare the deck structure of the RoughDeck with other low-profile floor scales. The placement of underdeck supports on the RoughDeck minimizes deflection in all directions. Intermediate supports are added to prevent the top plate from “dishing” under heavy point loads.

Accuracy Requires a Specialized Foot

Many scales retain side loads and suffer from poor return to zero when bumped laterally. The slight plasticity flow of the SUREFOOT™ design eliminates such residual side loads and provides excellent return to zero.

The RoughDeck was engineered to use a steel and neoprene sandwich design called SUREFOOT™. A steel cup sits on the floor and is bonded by a pliable neoprene cushion to a steel top plate with attached threaded stem. This pliable sandwich allows the stem and top plate some plasticity to move laterally and tilt independently of the bottom steel cup. This allows the foot to accommodate small deflections and uneven floors.

Load Cell Mounting Plate and SUREFOOT™

To minimize localized deflection of the load cell, the mounting plate is welded to the channel frame rather than the deck plate. Adjustable SUREFOOT™ support feet incorporate stainless steel and neoprene. This unique combination decreases extraneous forces on the load cell, resulting in superior accuracy and repeatability.

Load Cell and Cable Protection

The unique channel structure of the RoughDeck provides enclosed protection for underdeck components so they can’t be ripped out through rough handling use. Load cells are recessed within the 6" channels, and conduit lies within the channels to ease pulling of load cell cables through and deter rodent damage to the cables. A 20' length of hostile environment indicator cable is included to complete the installation.

TuffSeal Junction Box Protects Circuity

The rugged TuffSeal™ junction boxes are specifically designed to protect sensitive circuitry from damage caused by moisture. A stainless steel junction box is included with all models. Its unique closure design inhibits moisture ingress and a Gore™ breather vent helps equalize the pressure inside the enclosure which can be caused by sudden temperature or environmental changes.

RoughDeck HP, HP-H High Accuracy, Heavy Capacity

The RoughDeck HP’s best-in-class features are enhanced to deliver more reliability and higher performance than ever before. The RoughDeck HP’s NEMA 4 aluminum TuffSeal junction box is protected from forks and industrial abuse by a 6" structural steel channel frame and diamond trussplate safety deck. The junction box is also mounted as a handy slide-out tray that eases setup and service access. Cables include sturdy cord grips or a quick disconnect for added convenience. In addition, all load cell cables are enclosed in conduit, alleviating danger of rough handling. All load cells are recessed within the channel for protection on all sides, while maintaining easy access for leveling. What’s more, the RoughDeck HP is backed by an all-inclusive 5-year limited warranty!

Available in 1000 to 30,000 lb capacities, the RoughDeck HP is the industry leader for precision weighing in Legal-for-Trade applications.

Heavy-Capacity Model

The HP-H model offers the exact superior structural design of the HP model, but with added capacity for the most demanding applications. Both HP and HP-H have a slide-out junction box for quick access and superior protection from moisture and dirt.

RoughDeck SS Stainless Steel, Corrosion Resistant

The RoughDeck SS floor scale is designed specifically for Legal-for-Trade applications requiring the added corrosion protection of stainless steel. Applications include dry chemical operations, fertilizer plants and other industries which require non-washdown corrosion resistance. A rigid 6", 304 stainless steel channel frame and smooth top plate provide a durable scale deck. For added corrosion resistance, four NTEP-certified stainless steel load cells and surefeet, a stainless steel TuffSeal summing junction box and EL147HE hostile environment load cell cable complete the RoughDeck SS package.

The channel frame provides added protection by enclosing the load cells, cable and junction box inside, away from chemicals and other industrial elements.

RoughDeck HE Harsh chemical, washdown environments

The RoughDeck HE is a hostile environment, stainless steel floor scale designed specifically for corrosion resistance and longevity in demanding washdown applications. Design features include a 6", 304 stainless steel channel frame and smooth top plate. The RoughDeck HE comes standard with four stainless steel IP67 welded seal, door beam load cells, four stainless steel surefeet, a stainless steel NEMA 4X TuffSeal summing junction box and EL147HE hostile environment load cell cable. The stainless steel channel frame provides added protection by enclosing load cell cable and load cells, yet provides easy access for installation and service. The NEMA 4X summing TuffSeal junction box can be remotely mounted up to 10' from the scale, keeping sensitive electronic connections away from moisture and chemicals.

The RoughDeck SS floor scale is designed specifically for Legal-for-Trade applications requiring the added corrosion protection of stainless steel. Applications include dry chemical operations, fertilizer plants and other industries which require non-washdown corrosion resistance.
**RoughDeck**... IT DOESN'T GET ANY TOUGHER THAN THIS.

**Superior Structural Design**

Unlike most other scales, the RoughDeck utilizes a full 6" structural channel frame welded to a durable steel deck, providing exceptional rigidity under severe loading conditions (typical of fork lifts and pallet jacks). This design has proven so superior that the RoughDeck carries a full 5-year warranty on the deck structure. The cross sections shown compare the deck structure of the RoughDeck with other low-profile floor scales. The placement of underdeck supports on the RoughDeck minimizes deflection in all directions. Intermediate supports are added to prevent the top plate from “dishing” under heavy point loads.

**Accuracy Requires a Specialized Foot**

Many scales retain side loads and suffer from poor return to zero when bumped laterally. The slight plasticity flow of the SUREFOOT™ design eliminates such residual side loads and provides excellent return to zero.

The RoughDeck was engineered to use a steel and neoprene sandwich design called SUREFOOT. A steel cup sits on the floor and is bonded to a pliable neoprene cushion to a steel top plate with attached threaded stem. This pliable sandwich allows the stem and top plate some plasticity to move laterally and tilt independently of the bottom steel cup. This allows the foot to accommodate small deflections and uneven floors.

**Load Cell Mounting Plate and SUREFOOT**

To minimize localized deflection of the load cell, the mounting plate is welded to the channel frame rather than the deck plate. Adjustable SUREFOOT support feet incorporate stainless steel and neoprene. This unique combination decreases extraneous forces on the load cell, resulting in superior accuracy and repeatability.

**Load Cell and Cable Protection**

The unique channel structure of the RoughDeck provides enclosed protection for underdeck components so they can’t be ripped out through rough handling use. Load cells are recessed within the 6" channels, and conduit lies within the channels to ease pushing load cell cables through and deter rodent damage to the cables. A 20' length of hostile environment indicator cable is included to complete the installation.

**TuffSeal Junction Box Protects Circuitry**

The rugged TuffSeal junction boxes are specifically designed to protect sensitive circuitry from damage caused by moisture. A stainless steel junction box is included with all models. Its unique closure design inhibits moisture ingress and a Gore® breath vent helps equalize the pressure inside the enclosure which can be caused by sudden temperature or environmental changes.

**High Accuracy, Heavy Capacity**

The RoughDeck HP’s best-in-class features are enhanced to deliver more reliability and higher performance than ever before.

The RoughDeck HP™ NEMA 4K aluminum TuffSeal junction box is protected from forks and industrial abuse by a 6" structural steel channel frame and diamond treadplate safety deck. The junction box is also mounted as a handy slide-out tray that eases setup and service access. Cables include sturdy cord grips or a quick disconnect for added convenience. In addition, all load cell cables are enclosed in conduit, alleviating danger of rough handling. All load cells are recessed within the channel for protection on all sides, while maintaining easy access for leveling. What’s more, the RoughDeck HP is backed by an all-inclusive 5-year limited warranty.

Available in 1000 to 30,000 lb capacities, the RoughDeck HP is the industry leader for precision weighing in Legal-For-Trade applications.

**Heavy-Capacity Model**

The HP-H model offers the exact superior structural design of the HP model, but with added capacity for the most demanding applications.

Both HP and HP-H have a slide-out junction box for quick access and superior protection from moisture and dirt.

**Stainless Steel, Corrosion Resistant**

The RoughDeck SS floor scale is designed specifically for Legal-For-Trade applications requiring the added corrosion protection of stainless steel. Applications include dry chemical operations, fertilizer plants and other industries which require non-washdown corrosion resistance. A rigid 6", 304 stainless steel channel frame and smooth top plate provide a durable scale deck. For added corrosion resistance, four NTEP-certified stainless steel load cell and sensors; a stainless steel TuffSeal junction box and EL147HE hostile environment load cell cable complete the RoughDeck SS package.

The channel frame provides added protection by enclosing the load cells, cable and junction box inside, away from chemicals and other industrial elements.

**Stainless Steel, Washdown Design**

The RoughDeck HE is a hostile environment, stainless steel floor scale designed specifically for corrosion resistance in and longevity in demanding washdown applications. Design features include a 6", 304 stainless steel channel frame and smooth top plate. The RoughDeck HE comes standard with stainless steel IP67 welded seal, stainless steel surefoot, a stainless steel NEMA 4K TuffSeal junction box with cable and EL147HE hostile environment load cell cable.

The stainless steel channel frame provides added protection by enclosing load cell cable and load cells, yet provides easy access for installation and service. The NEMA 4K-summing junction box and EL147HE hostile environment load cell cable can be remotely mounted up to 10' from the scale, keeping sensitive electronic connections away from moisture and chemicals.

**Non washdown environments**

- **Canada Approved**
- **Non washdown environments**
- **Corrosive, dry chemical environments**
- **Harsh chemical or washdown environments**

**HP-H Model**

The HP-H model offers the exact superior structural design of the HP model, but with added capacity for the most demanding applications.

Both HP and HP-H have a slide-out junction box for quick access and superior protection from moisture and dirt.

**RoughDeck SS Stainless Steel, Corrosion Resistant**

The RoughDeck SS floor scale is designed specifically for Legal-For-Trade applications requiring the added corrosion protection of stainless steel. Applications include dry chemical operations, fertilizer plants and other industries which require non-washdown corrosion resistance. A rigid 6", 304 stainless steel channel frame and smooth top plate provide a durable scale deck. For added corrosion resistance, four NTEP-certified stainless steel load cell and sensors; a stainless steel TuffSeal junction box and EL147HE hostile environment load cell cable complete the RoughDeck SS package.

The channel frame provides added protection by enclosing the load cells, cable and junction box inside, away from chemicals and other industrial elements.

**RoughDeck HE Stainless Steel, Washdown Design**

The RoughDeck HE is a hostile environment, stainless steel floor scale designed specifically for corrosion resistance in and longevity in demanding washdown applications. Design features include a 6", 304 stainless steel channel frame and smooth top plate. The RoughDeck HE comes standard with stainless steel IP67 welded seal, stainless steel surefoot, a stainless steel NEMA 4K TuffSeal junction box and EL147HE hostile environment load cell cable.

The stainless steel channel frame provides added protection by enclosing load cell cable and load cells, yet provides easy access for installation and service. The NEMA 4K-summing junction box and EL147HE hostile environment load cell cable can be remotely mounted up to 10' from the scale, keeping sensitive electronic connections away from moisture and chemicals.

**Non washdown environments**

- **Canada Approved**
- **Non washdown environments**
- **Corrosive, dry chemical environments**
