IT'S ALL CONNECTED

No need to design or program the connection between the robot controller and hardware; we've done it.

All the elements included in the box are connected, so you don't have to spend any time on this.

HIGH PERFORMANCE

Earn an ROI faster than with other cobot solutions, because of the high performance cycle time.

What makes it perform so well? The Robotiq software generates optimized cobot motions based on the pallet layout. It also synchronizes motion control of the cobot and 7th axis for the AX Series. Plus, seamless movements mean a longer life cycle for your cobot.

FITS EASILY WITHIN YOUR EXISTING FLOOR PLAN

The Robotiq Palletizing Solution fits easily within your existing floor plan, given its small footprint. No need to reorganize your floor layout around a central robot.

SAFETY FIRST

Because safety is crucial, we've built an environment for safe integration. We also support third-party safeguard devices.

AX Series fully integrated vertical axis

PE Series manually adjustable pedestal
