Mobile-*matic*™

Portable Dispenser

Mobile-*matic*™

Portable Dispenser

Maximize throughput, increase efficiency and take your first steps into automation with the Mobile-matic™ Portable Dispenser. Regardless of the size of your operation, the Mobile-matic™ is easily integrated into your current distribution system with minimal planning or modifications. Simply stack product into the channels, roll the unit up to your conveyor and plug it in. Connected to your network, the Mobile-matic™ automatically ejects items into the correct containers or directly onto the belt.

Excellent For Seasonal Or Promotional Volume Bursts

The Mobile-matic™ is ideal for SKUs that experience seasonal or promotional spikes in demand. Put it to work dispensing your fastest moving product, relieving pressure from your manual picking operations and eliminating the need to re-slot additional lanes of SKUs to accommodate increased demand.

Plug And Play

The Mobile-matic™ is a simple "out-of-the-box" solution. Controls are included and no special cabling is required. Just unpack it, roll it up to your conveyor and connect power and network cabling.

Economical Entry Into Automation

Because it doesn't require the planning, system modifications and major investments typical of other solutions, the Mobile-matic™ is a practical and cost-effective stepping stone into the world of automation. With its compact footprint, the unit is easily moved into position next to your existing conveyor or small workstations can be designed to eliminate manual pick functions and free up labor resources.

Scalable And Flexible

Start with a single 16-channel unit and add additional units as you need them; one "parent" unit controls up to 3 additional units. The Mobile-matic™ works side-by-side with your other picking operations, including pick-to-light, carousels, traditional A-frames and manual order picking systems.

Minimal Maintenance Cost

Because the Mobile-matic™ is a simple, straightforward solution, there is virtually no maintenance required.

Easily Integrated With Warehouse Software

The Mobile-matic™ is easily integrated into your existing warehouse controls software or pair it with our SINTHESIS® Software modules to achieve even greater efficiency.
