

Drop-Bottom Container

with Bar Grate Decking

For many year's Steel King's custom container division has been known for designing containers for a wide variety of industrial uses. Every now and then we run into an application that obviously could be a great benefit to many businesses. The Drop-Bottom Container with Bar Grate decking is one of these products.

Steel King's Drop Bottom Containers with bar grate deck are ideal for foundry applications.

Drop Bottom Containers are an excellent solution for foundry and forging operations. Ventilation holes are punched on container sides to facilitate easy ventilation and cooling of your product.

Bar Grate decking allows dirt and debris to fall through keeping your forgings clean.

A hinged deck allows for easy release of your materials when cooled. Includes a locking latch assembly to prevent parts from discharging until bail comes in contact with engagement angle on workstand.

Hinged Drop-Gate allows for easy unloading.

Product Specifications:

Model Numbers:	DBC-4548-24-BG DBC-4048-24-BG
Sizes:	45" x 48" x 24" (usable height) 40" x 48" x 24" (usable height) Approx 34" actual height Custom Sizes Available
Load Capacity:	4000# and 6000# capacity each
Stacking Height:	Stack up to 4 high
Color:	Choice of 12 standard colors
