Our Products Alert Employees Of Dangerous Collisions BEFORE They Occur!

11,000 UNITS IN USE!
We’re the Leader in Intersection Protection. Our goal is to help your employees avoid accidents and reduce your exposure to liabilities.

Collision Awareness products are designed to monitor any traffic & alert others, just around the corner.

40% of all forklift fatalities are caused by an individual being struck or run over by a forklift.

Many of these accidents and fatalities can be avoided by warning pedestrians and operators of approaching danger.

Our LOOK OUT Sensor Alert Warning System allows for quick and easy recognition of possible hazardous situations. Why take chances of liabilities when you can avoid accidents and protect your most valuable assets.

By creating awareness to a possible danger, you reduce the risk of damage, injury and death. Reducing risk should reduce your liability and exposure to workman’s compensation claims, and increase employee morale as they see the company efforts to provide a safe workplace.

Collision Awareness chooses Bosch sensors as their standard sensor for the 42 standard package offerings. The quality and reputation of Bosch, together with Collision Awareness, continues to place us as the leaders of Intersection Protection. This upgrade improves the field of detection and reduces false alerts. Includes a blue sensor indicator light.

NEW STATE-OF-THE-ART SENSORS

Collision Awareness chooses Bosch sensors as their standard sensor for the 42 standard package offerings. The quality and reputation of Bosch, together with Collision Awareness, continues to place us as the leaders of Intersection Protection. This upgrade improves the field of detection and reduces false alerts. Includes a blue sensor indicator light.
APPLICATION SPECIFIC SENSORS
(At an additional cost)

**EXTERIOR SENSOR**

- Coverage: 40’ x 40’
- Temperature range: -40°F – 122°F
- High reliability against water and insects
- Double conductive shielding can resist more than 50,000 lux of sunlight, eliminating false alarms from light sources.
- Day and Night—Capable of sensing around the clock; both during the day and through the night.

**INTERIOR HIGH SENSITIVITY SENSOR**

- Coverage: 100’ x 8.5’
- Temperature range: -22°F – 130°F
- Perfect for high mount applications.
- Recommended for tunnel applications.
- The transceiver automatically adjusts its detection thresholds based on input from the PIR sensors. Integrating the target distance information from the PIR significantly reduces false alarms from the Doppler radar.

**RADAR SENSOR**

- Coverage: 50’ x 90°
- Temperature range: 32°F – 122°F
- Selectable range up to 50’
- Combined range-controlled radar technology with a passive infrared system to increase false alarm immunity by allowing it to sense human-sized objects within a specified range.

**FIT SENSOR**

- Coverage: Available in 70’, 130’, and up to maximum distance of 200’ between sensors
- Temperature range: -31°F - 140°F
- Utilizes infrared beam disruption detection
- Used in our Fit Packages 1, 2, and 3 for alerting drivers to overhead obstacles (pg. 11)

- With a high reliability against water and insects, a dust-tight seal, an anti-frost hood cover, and an automatic gain control circuit that monitors changes in conditions and adjusts the signal’s strength and sensitivity, this sensor is perfectly fit for both indoor and outdoor applications.

**STANDARD POWER SUPPLY CORDS**

Suggested lengths based on application:
- Wall mounted – 15’ (pictured)
- Rack mounted – 25’
- Ceiling hung – 50’, 75’, or 100’

Universal Transformer (pictured)
A UL listed universal transformer is used in order to receive incoming voltage from 120 Vac, 220 Vac, or 277 Vac and is reduced to 24 Vdc to energize our units. The transformer is mounted in a UL approved junction box by a licensed electrician and then the remaining 2’ cord plugs into the top of our units, just like the standard power supply jack.
CONSIDER THE BASICS

Detect on one side, alert on the other side

Choose from the following six basic models

**ECONOMY STROBE**

An inexpensive and economical way to detect in one direction and alert with a bright red strobe

**Includes:**
- Red Strobe
- Control Box
- Wall Mount Bracket
- Interior Sensor
- Interior Strobe

**AREA MONITOR**

Mount in an area where there are no defined traffic lanes and rotate towards traffic as patterns change.

**Includes:**
- Wall mounted aluminum arm with a swivel
- Red Strobe
- All Weather Sensor

Sensor detects up to 35 feet away, 24 hours a day

Featured: Hall Door Basic

Toll FREE: 888-324-1920
**OFFICE DOOR BASIC**

Alert individuals inside the office of forklift activity on the other side of an office door as well as foot traffic entering the office area.

**Includes:**
- Low profile office box
- Interior Sensor
- Wall Mount Bracket

**OVERHEAD DOOR BASIC—SINGLE**

Alert forklift operators and individuals in a two way traffic pattern of potentially dangerous traffic coming through strip doors, high speed doors, and passing through openings.

**Includes:**
- OHD Box with one large red light
- Interior Sensor
- Wall Mount Bracket

**Options for Improved Visibility:**
- Add additional Interior Sensor
- Add an Interior Audible Alert
- Add on the Wall Burst feature (Available on any yellow box style)

**HALL DOOR BASIC**

Alert individuals and forklift drivers of potentially dangerous traffic on the other side of a door or hallway. (See illustration on previous page)

**Includes:**
- Interior Alerting Box with two small red lights
- Interior Sensor
- Wall Mount Bracket

**OVERHEAD DOOR BASIC—DOUBLE**

Alert forklift operators and individuals in a two way traffic pattern of potentially dangerous traffic coming through strip doors, high speed doors, and passing through openings.

**Includes:**
- DOD Box with two large red lights
- Interior Sensor
- Wall Mount Bracket

Sales@CollisionAwareness.com
**HALL DOOR MONITORS 2, 3, & 4** include sensors to detect pedestrians as they approach the door and alert the forklift operator as they pass by the doorway, creating a safety zone. The sets of **HALL DOOR MONITORS** below illustrate the options available. We can also develop custom options for your specific needs. A 15’ power cord is recommended and is an additional cost. Longer power cords are also available and come in 25’, 50’, and 100’.

**HALL DOOR MONITOR 2**
- Includes: Two Interior Alerting Boxes, both with two small red lights
- Two Interior Sensors
- 3’ Wiring Harness

**HALL DOOR MONITOR 3**
- Includes: Interior Alerting Box with two small red lights
- OHD Box with one large red light
- Two Interior Sensors
- 3’ Wiring Harness

**HALL DOOR MONITOR 4**
- Includes: Interior Alerting Box with two small red lights
- DOD Box with two large red lights
- Three Interior Sensors
- 3’ Wiring Harness

**Options for Improved Visibility:**
- Add an Interior Audible Alert
- Add on the Wall Burst feature

**Featured:** Hall Door Monitor 2
The Overhead Door series is similar to the Hall Door series, except with larger lights. **OVERHEAD DOOR 2** is your primary line of defense designed to alert forklift operators and pedestrians as they approach an overhead doorway. Before passing through, the sensor(s) detect motion on one side and activate the light on the opposite side, alerting pedestrians and forklift operators. **OVERHEAD DOOR 3 & 4** expand your area of defense with multiple sensors to alert forklift operators and individuals as they approach an overhead doorway. The additional radius of sensors will help protect high-traffic areas and areas that may consist of either temporary or permanent obstructions which block the view of approaching traffic.

**OVERHEAD DOOR 2**
- Includes: Two OHD Boxes, both with one large red light
- Includes: Two Interior Sensors
- Includes: 3' Wiring Harness

**OVERHEAD DOOR 3**
- Includes: OHD Box with one large red light
- Includes: DOD Box with two large red lights
- Includes: Three Interior Sensors
- Includes: 3' Wiring Harness

**OVERHEAD DOOR 4**
- Includes: Two DOD Boxes, both with two large red lights
- Includes: Four Interior Sensors
- Includes: 3' Wiring Harness

**GREAT FOR:**
- Expensive high speed doors
- Strip doors

Featured: Overhead Door 2
FOR TYPICAL FORKLIFT TRAFFIC ALERTS
Each sensor alerts the opposite corner and both sensors can be activated simultaneously. Units include mounting hardware and can be installed in minutes. UL listed for US and Canada.

**LOOK OUT 1**
- End of rack aisles
- Wall mount for end of aisle obstructions
- Uses a single set of flashing LED lights
- 528 lumens from each lens

**LOOK OUT 1 WALL**
- Mount to wall opposite of end of rack aisles
- Uses a set of 2 small flashing LED lights
- 528 lumens from each lens

**LOOK OUT 2**
- An additional set of lights that alternate when activated

**LOOK OUT 2 XL**
- Available in a ceiling hung model
- Floor Burst available—see page 10

**Options for Improved Visibility:**
- Add Interior Audible
- Wall Burst Option Available on Look Out 1 Wall

**Interior Audible** **Wall Burst**

MADE in the U.S.A.
**LOOK OUT 3’s**

**LOOK OUT 3 RACK**
- Monitor 3-way intersections and alert in all directions
- Two sensors monitor the main aisle while a third monitors the row that meets in the main aisle to provide an alert in 3 directions
- 25’ power cord recommended

**LOOK OUT 3 WALL**
- Monitor 3-way intersections and alert in all directions
- Two sensors monitor the main aisle while a third monitors the row that meets in the main aisle to provide an alert in 3 directions
- 25’ power cord recommended

**LOOK OUT 3**
- Ceiling Hung
  - For 2, 3 or 4-way intersections to monitor and alert just around the corner
  - Sensor range is 35’ away and 40’ wide, adequate distance to stop a fork truck traveling at OSHA recommended speeds
  - 50’ power cord is recommended
  - Optional “Brilliant” lights for mounts above 20’
  - Floor Burst available—see page 10

**Options for Improved Visibility:**
- Add Interior Audible
- Add Wall Burst

**Interior Audible**

**Wall Burst**

Made in the U.S.A.
Too often employees can become distracted and miss important warning devices. Our new Floor Burst option provides an extremely fast pulsating light that illuminates the floor of an intersection before traffic passes through. This feature is offered on all of our ceiling hung models, Look Out 2, 3, & 4.

AN ADDITIONAL BURST OF SAFETY!

• For 2, 3 or 4-way intersections to monitor and alert just around the corner
• Sensor range is 35' away and 40' wide, adequate distance to stop a fork truck traveling at OSHA recommended speeds
• 50' power cord is recommended
• Optional “Brilliant” lights for mounts above 20'
THE ‘FIT’ HEIGHT AWARENESS SENSORS

The ‘FIT’ height warning sensors alert truck drivers of overhead obstacles that may be in the line of an elevated mast. When sensor beams are broken, the ‘FIT’ lights and audible continuously alert the driver to potential danger. Sensors should be mounted to protect obstacles approximately 10’ – 15’ before obstacles. 15’ power cord is recommended.

- Choose from 70’, 130’, and 200’ options for distance between sensors.
- Sensors and selectable audible can be used for interior or exterior applications.

Add additional sets of sensors to detect from the opposite side or from multiple openings.

- Fit Pkg 1 – 1 set of sensors
- Fit Pkg 2 – 2 sets of sensors
- Fit Pkg 3 – 3 sets of sensors

---

**GREAT FOR:**

- Sprinkler heads above rack
- Overhead heaters
- Overhead lights
- Overhead Storage
- Ceiling Fans
- Air handlers

- Loading Dock Awnings
- Industrial Canopies
- Overhead Bridge Cranes
- Interior Doorways
- Parking Garages

**Selectable Audible**

- Choice of 32 tones
- Remote activation up to two tones
- Up to two remote selectable tones produces 82 -100 dBA

---

**Figure 1**

Select a FIT Package below:

- **FIT Package 1** – 1 set of sensors
- **FIT Package 2** – 2 sets of sensors
- **FIT Package 3** – 3 sets of sensors

**Add additional sets of sensors to detect from the opposite side or from multiple openings.**

- Fit Pkg 1 – 1 set of sensors
- Fit Pkg 2 – 2 sets of sensors
- Fit Pkg 3 – 3 sets of sensors

---

DOCK WATCHER SENSORS

KEEP DOCK TRAFFIC WORKING WITH SAFETY IN MIND!

DOCK DOOR MONITORS

DOCK DOOR MONITORS have a wall mounted arm with swivel feature that allows the exterior sensor to monitor activity in a trailer. As the fork truck backs out, the bright flashing strobe warns co-workers. Plugs directly to a 110 Vac outlet.

- Exterior Sensor
- Aluminum Arm
- Sealed Red Strobe

Dock Watcher 1: 1-2 Doors
Dock Watcher 2: 3-4 Doors

DOCK WATCHERS

DOCK WATCHER 1 is designed to monitor one or two dock doors. It senses motion and warns operators and pedestrians of impending danger. It is a ceiling hung sensor that mounts high enough to allow all mobile traffic to clear.

By adding remote sensors you create DOCK WATCHERS 2, 3, or 4. Specify the cable length needed for each remote sensor. Sensors can point to door locations and also identify motion in traffic areas near the loading dock. Unit hangs from your chain.

Dock Watcher 1: 1-2 Doors
Dock Watcher 2: 3-4 Doors

DDM without activity  DDM with activity  Mount to door track or wall

1 additional sensor
1-2 Doors includes 1 extra sensor

2 additional sensors
3-4 Doors includes 2 extra sensors

3 additional sensors
5-7 Doors includes 3 extra sensors

Outstanding Features

- Made In America
- Alerts pedestrians of approaching traffic
- Light activated sensors let you know you’re detected, giving you peace of mind
- Significant loss prevention benefits
- Great for hearing impaired employees
- Light flash patterns safe for those with epilepsy
- Newly designed flash patterns to reduce false alerts, known as Imminent Danger
- Option for audible alert for indoor or outdoor applications
- Optional floor or wall burst
- Applications such as wash down environments
- All sensors can be rotated up, down, left, and right for better detection
- Options for direct wiring via conduit
- All models low voltage
- LED lights have 100,000 hour warranty
- All models ship UPS

KEEP YOUR WORK FORCE PROTECTED FROM EXTERIOR TRAFFIC ALSO! Collision Awareness continues to develop additional products to keep you protected. Below are new exterior options. Simply choose which option alerts indoors from **Dual Use 1 through 4** with an exterior sensor and bracket. If you require detection on both sides of the door, choose from **Dual Use 5 through 12**, with sensors and alerting boxes on both sides of the walls on the following pages.

**DUAL USE 1 EXT—STB**
- Red Strobe, Control Box, and Wall Mount Bracket
- Exterior Sensor
- Wall Mount Bracket

**DUAL USE 2 EXT—SML**
- Interior Alerting Box with two small red lights
- Exterior Sensor
- Wall Mount Bracket

**DUAL USE 3 EXT—OHD**
- OHD Box with one large red light
- Exterior Sensor
- Wall Mount Bracket

**DUAL USE 4 EXT—DOD**
- DOD Box with two large red lights
- Exterior Sensor
- Wall Mount Bracket

**Options for Improved Visibility:**
- Add additional Exterior Sensor
- Add an Interior Audible Alert
- Add on the Wall Burst feature (Available on any yellow box style)
Options for Improved Visibility:
- Add additional Exterior Sensor
- Add additional Interior Sensor
