

Outdoor Convex Detection Mirrors

Outdoor Convex Detection Mirrors help monitor blind spots and are designed to prevent intersection accidents in industrial applications.

Convex mirrors can be positioned to reflect a hidden area to a forklift operator. These mirrors can also be directed to allow equipment operators to view co-workers approaching from behind to reduce accidents.

Convex mirrors should be mounted in positions that reflect the view of the traffic moving from the neighboring directions. Properly placed mirrors can help monitor entrances and alleys for unauthorized visitors.

- **20% Brighter Than Glass Mirrors**
- **Mounting Hardware Included**
- **Less Distortion**
- **Economical**
- **Longer Lasting**
- **Lighter Weight**

■ **Easy to Install**

Mounted Easily with the Provided Heavy-Duty Hardware
