

DLFAN Series

18" Warehouse Fan With Lighting Option

Shown with optional heavy duty mounting bracket and HPS lamp

Description

The DLFAN series warehouse fan from Tri Lite provides you with a powerful ventilation and cooling solution. It can be mounted up and out of the way and still direct airflow in any direction desired. Your choice of 24", 40" or 60" arm lengths.

Featuring a heavy duty, low vibration 3 speed 18" fan, this system can move over 3,000 cubic feet of air per minute. This helps your facility realize increased safety and productivity by keeping your employees cool on those hot summer days. In the winter, it decreases thermal stratification, keeping the warehouse more comfortable while reducing heating costs.

For even more versatility, add a lamp head assembly and shine light anywhere you need it. Lamp choices include durable polycarbonate lamp head with incandescent or LED PAR38 bulbs, metal lamp head or high pressure sodium lamp head.

All Tri Lite fans and dock lights are UL / cUL listed.

Features

- High output fan provides safer and more comfortable environment for warehouse workers.
- Arm design allows fan to be mounted out of the way.
- Provides adjustable airflow.
- Durable design and construction for reduced maintenance costs.
- Easy to install.
- UL listed.

Typical Applications

Excellent for anywhere you need dependable, high volume ventilation:

- Warehouse loading docks.
- Production facilities.
- Auto shops.
- Machine rooms.
- Rail car loading platforms.
